Pacific Highway upgrade between Ourimbah Street, Lisarow and Glen Road, Ourimbah

July 2015

The NSW Government is providing $100 million to build the Pacific Highway upgrade between Ourimbah Street, Lisarow and Glen Road, Ourimbah. This update contains information about upcoming project activities.

Roads and Maritime Services is upgrading the Pacific Highway between Ourimbah Street, Lisarow and Glen Road, Ourimbah. The upgrade involves widening the highway to provide two lanes in each direction to improve traffic flow, travel times and safety.

The concept design and review of environmental factors (REF) for this section of highway was displayed for community comment in June 2011. In October 2011 the REF was determined and the project received approval to proceed to detailed design. The REF and submissions report are available to view at rms.nsw.gov.au/roadprojects

A map of the upgrade is provided in this update and includes:

- Two lanes in each direction on the Pacific Highway
- Traffic lights with pedestrian facilities at Ourimbah Street, Teralba Street and Walmsley Road to improve safety and access to connecting roads
- Improved pedestrian and cyclist facilities along the western side of the highway
- New bridges over Cut Rock Creek.

Roads and Maritime is calling for tenders to build the upgrade. Construction is expected to start by the end of this year and be completed in 2018, weather permitting.

We are committed to working with the community and stakeholders to understand and minimise potential impacts of the construction activities. More information about construction activities including timing, impacts and mitigation activities will be provided prior to work starting.
