The Australian and New South Wales governments are funding the $820 million Oxley Highway to Kundabung Pacific Highway project. With your consent, work will sometimes take place outside standard working hours or at night. This allows us to build the project faster and at times more safely. We are seeking your consent to carry out some activities out of hours for the next three months.

**Proposed out of hours work – your feedback is important**

Approved hours of construction are from 7am to 6pm on Monday to Friday and 8am to 1pm on Saturdays. As part of building the highway upgrade some activities may need to occur outside of these hours, including at night, from July 2015 to the end of September 2015.

The team is proposing to carry out some site preparation and maintenance activities outside of approved day time hours to enable construction activity to be completed within the approved times. Some night work will be required during the next three months to complete maintenance of the Pacific Highway, bridge construction work and drainage installation on the highway. Residents directly affected by this work will be notified about time and duration of these activities. No work will be carried out on Sundays or public holidays.

**Site preparation**

The project team is seeking consent from residents to allow site preparation and maintenance activities to be carried out outside of approved day time hours. It is proposed that some activities will start at 6am (one hour before the approved time) and some activities to be carried out between 6pm and 7pm (one hour after the approved time) Mondays to Fridays. While there will be limited activities carried out on Saturdays, the project team may need to work between 7am and 5pm.

These activities will ensure the site is maintained and ready for full construction activity to begin at the approved time and may include:

- filling up water tanks (used for dust suppression)
- watering of haul roads, laydown areas and access routes for dust suppression
- general access on site by light vehicles for inspections
- servicing and refuelling of machines (on location, to reduce transport back to the workshop)

A summary of the proposed out of hours activities accompanies this letter, with details of work locations and approximate timing to complete each activity.

Night work

The team is proposing to carry out some activities at night. Night work activities begin at 6pm and are completed no later than 7am. This work is to minimise the impact to traffic on the existing Pacific Highway, help ensure the safety of workers and road users when construction activity is adjacent to traffic and ensure the structural integrity of work is maintained (for example, concrete pours which once started must be completed).

Work to be carried out at night includes:

- placement of concrete barriers on the Pacific Highway
- traffic control measures required to install concrete barriers
- line marking
- drainage work on the Pacific Highway and near the railway line
- maintenance of existing Pacific Highway
- delivery of over-sized materials
- concrete deliveries (via concrete trucks)
- crane operation
- hand screeding in the precast yard area (Glen Ewan Road)

How will noise and vibration be managed?

The project team has prepared mitigation measures to manage the impact of noise and vibration. This includes minimising heavy machinery interaction, audio sensitive reversing beepers planning activities to minimise reversing and regular noise monitoring. During the out of hours activities, traffic management will be in place to ensure the safety of motorists, residents and workers.

Have your say

As your property is nearby the project, it could potentially be affected by some of the activities listed above. We are seeking your feedback on the proposed out of hours activities.

Please fill in the feedback form attached and return to the project team by **10 July 2015**. You can return it by using the self-addressed reply paid envelope, or emailing the form to contactOH2Ku@lendlease.com

Please note that if no feedback is received, the project team will make a note that you have no objection to the out of hours work proposal.

What happens once I provide feedback?

The project team is committed to providing regular notifications about potential activities to keep the community informed. The project team will contact affected residents a minimum of 48 hours before the start of any audible out of hours work to confirm the impact and the timing of the activity.

Comments:

Affected residents will receive a confirmation of out of hours activities a minimum of 48 hours before work begins. If you would like to receive a notification of work in your area please indicate your preferred contact method below:

- Verbal
- Email
- SMS

An out of hours works package will be distributed every three months outlining the proposed activities. If you would like to continue to receive this package please indicate below. If you opt not to receive further notices it will be noted that you do not object to out of hours work.

- NO – I don’t want to receive the information package and acknowledge the potential for future out of hours work
- YES – I would like to be consulted on all potential out of hours work
