August 2018

1.6 kilometres of highway will be upgraded to three lanes in each direction on the Princes Highway between Bolong Road and Moss Street.

There will be additional lanes turning right into Illaroo Road from the Princes Highway and additional lanes on Illaroo Road to provide better access onto Princes Highway. Following community consultation, the upgraded Illaroo Road and Princes Highway intersection will include one dedicated left turn lane and three right turn lanes for motorists travelling onto the Princes Highway.

The new bridge will be four lanes and carry northbound traffic. It will include a 3.5 metre shared use path on the western side. The existing northbound bridge will carry three lanes of southbound traffic.

The existing southbound bridge will be kept to provide pedestrian and cyclist access.

Access to Pleasant Way at the existing intersection will be closed to improve traffic flow on this section of the highway. A new road will be built further south connecting Princes Highway to Lyrebird Drive and will provide left in-left out movements for motorists.

Access to Pleasant Way at the existing intersection will be closed to improve traffic flow on this section of the highway.

The existing southbound bridge will be kept to provide pedestrian and cyclist access.

The new bridge will be four lanes and carry northbound traffic. It will include a 3.5 metre shared use path on the western side. The existing northbound bridge will carry three lanes of southbound traffic.

An extra left turn lane from Illaroo Road onto Princes Highway will be provided for motorists turning north onto the highway.

An extra right turn lane will be added on Illaroo Road for motorists turning south onto the highway.

An extra right turn lane will be added on Illaroo Road for motorists turning right into Illaroo Road from Princes Highway.

An extra turn lane on Bolong Road for motorists turning north onto Princes Highway.

Two left turn lanes for motorists turning south onto Princes Highway.

Two lanes turning right into Bolong Road from Princes Highway.

A right turn lane on Bolong Road for motorists turning north onto Princes Highway.

The new bridge will be four lanes and carry northbound traffic. It will include a 3.5 metre shared use path on the western side. The existing northbound bridge will carry three lanes of southbound traffic.

The existing southbound bridge will be kept to provide pedestrian and cyclist access.

Improved connectivity (better pedestrian and cyclist links)

Improved intersections (better intersections providing faster and more reliable access to and from local roads)

Increase freight access (removing the height limit for the southbound crossing)

Reduce traffic delays (more lanes on the Princes Highway and at major local intersections to improve traffic flow)
