Project update – Intersection improvements on Great Western Highway and Pages Road, St Marys

The NSW Government is funding this proposal as part of its $225 million Pinch Point Program which aims to reduce delays, manage congestion and improve travel times on Sydney’s major roads.

Roads and Maritime invited feedback on the proposal in October 2017. We received feedback from eleven people with three people supporting the proposal, seven people against the proposal and one person who did not state a preference. Key matters raised included:

• lengthening of the median on Pages Road
• installing speeding humps on Pages Road
• adding an additional lane on the Pages Road approach to the intersection.

After considering all responses, along with the proposal’s aims and design requirements, we have decided to implement further changes to the proposal including:

• reducing the length of the proposed new median on Pages Road

This will allow delivery trucks over six metres in length to turn right at the southern entrance into the Pages Road commercial centre. This access will be entrance only and “no exit”.

We have directly responded to all community members who provided feedback.

Roads and Maritime thanks everyone who reviewed the proposal and provided feedback.

Next steps

We have considered all submissions and will ensure our team is aware of concerns raised by the community. We will ensure that issues highlighted by stakeholders and the community are appropriately addressed throughout the next phase of this project.

We will continue to keep the community informed of the project progress.

Contact

If you have any questions, please contact our Project Manager, Martin Gormley, on 1800 572 004 or pinchpoint@rms.nsw.gov.au.
For more information on our projects, visit rms.nsw.gov.au.
Intersection upgrade at Great Western Highway and Pages Road

- Increase length of right turn lane
- Convert left only lane to a shared through and left
- Remove existing median
- Proposed extended raised median, adjusted to improve sight distances for right turn filter movement
- No right turn into business park - delivery trucks over six metres in length excepted

KEY
- Existing realigned median
- Extended median

---
