MEDIA RELEASE

HAVE YOUR SAY ON NEW PERMANENT ELECTRONIC MESSAGE SIGNS AT COLYTON AND ST CLAIR

The community is invited to have its say on new permanent electronic message signs proposed for installation westbound on the Great Western Highway at Colyton and on Mamre Road at St Clair.

“The NSW Government provided $6 million from the $246 million pinch point program to install fourteen electronic signs on key roads around Sydney,” said Tanya Davies MP, Member for Mulgoa.

“Installation of electronic message signs at key locations across the network aims to provide motorists with information on traffic conditions including delays, crashes, special events and detours in the area.

“Feedback is invited by Monday 15 September on the proposal to install a permanent electronic message sign on the Great Western Highway, 280 metres west of the Carlisle Street intersection and on Mamre Road, 400 metres south of the Luddenham Road intersection.”

“Further investigations to inform the site design are expected to be completed by the end of the year, weather permitting” Tanya Davies said.

“The community is invited to provide written feedback to Roads and Maritime Services Project Manager Renuka Kaul, PO Box 973, Parramatta NSW 2124 or email renuka.kaul@rms.nsw.gov.au.” Tanya said.

Residents will be advised in advance of further investigations to assess underground utilities, soil and to inform urban design improvements.
