Roads and Maritime Austroads Guide Supplement
Publication No: 11.091 12 August 2015
Supersedes version: 1.0

Roads and Maritime Supplement to Austroads Guide to Road Design Part 2: Design Considerations
Version 2.0

General

Austroads has released the Guide to Road Design, Part 2: Design Considerations and all road agencies across Australasia have agreed to adopt the Austroads guides to provide a level of consistency and harmonisation across all jurisdictions. This agreement means that the new Austroads guides and the Australian Standards, which are referenced in them, will become the primary technical references for use within the Agency.

This supplement is issued to clarify, add to, or modify the Austroads Guide to Road Design, Part 2: Design Considerations

Roads and Maritime Services accept the principles in the Austroads Guide to Road Design, Part 2: Design Considerations with variations documented in this supplement under the following categories:

- Roads and Maritime Enhanced Practice: Roads and Maritime practices which enhance the Austroads Guides.
- Roads and Maritime Complementary Material: Roads and Maritime reference material that complements the Austroads Guides. These documents include Roads and Maritime Manuals, Technical Directions and/or other reference material and are to be read in conjunction with the Austroads Guides.
- Roads and Maritime Departures: Roads and Maritime practices that depart from the Austroads Guides.

For other associated supplements see the Roads and Maritime supplement for Australian Standards and Roads and Maritime supplement for Austroads.

All additional information or references mentioned in this part should be checked against the Roads and Maritime Policy, Procedure, Direction etc.

Note: * Indicates new Roads and Maritime practice as of 12 August 2015.

Note: The titles and subtitles of the Austroads Supplement must directly reflect the titles and subtitles of the Austroads Guide that is being modified.
