CADD Manual
Notice

This document is a copy of one of the Road and Traffic Authority of New South Wales’ (the “Authority”) Design Reference Documents.

The Design Reference Documents are policy documents within the meaning of the Freedom of Information Act 1989 (NSW) (“FOI Act”) and this document is accordingly made available to you pursuant to Section 15(1) of the FOI Act.

The Design Reference Documents were developed by the Authority for use with roadworks and bridgeworks contracts let by the Authority or local councils. The Authority only uses the Design Reference Documents in conjunction with its other standard form documents and under the supervision of professional civil engineers who are trained and experienced in roadworks and bridgeworks. The Authority does not use the Design Documents for any other purpose and does not consider them suitable for use for any other purpose.

Consistent with the FOI Act, the purposes for which this document has been made available for inspection or purchase by you are:

- to satisfy the Authority’s obligation under Section 15(1) of the FOI Act to make its policy documents available for inspection and purchase by members of the public; and
- to ensure that you, as a member of the public who may be affected by the operation of this document, have access to the document.

The price which you have paid for this printed document only covers the Authority’s costs of printing and handling the document.

If you use this document for any purpose which is not consistent with the above (including, without limitation, for carrying out any construction, engineering, maintenance or other work), you do so at your own risk.

This document is current as at the date of this notice. However, you should be aware that the Authority regularly reviews and updates its Design Documents. You will not be notified of any update.

The Authority makes no representations or warranty that the Design Reference Documents have been prepared with reasonable care and does not assume a duty of care to you. The Authority has no responsibility to inform you of any matter coming to the Authority’s notice which may affect the quality of the Design Reference Documents in any way. You may print a copy of the Design Reference Documents for your own purposes, but must not copy, reproduce or modify the Design Reference Documents.

No advisory or support services will be provided by the Authority.

Copyright in this document belongs to the Roads and Traffic Authority of New South Wales and all rights are reserved.

Electronic copies of Design Reference Documents are not to be supplied in MS Word format outside the RTA unless loaned, by the appropriate RTA Project Manager, to professional services contractors or Councils for preparing tender documents for RTA funded projects. In which cases, the contractors and Councils are required to return them to the RTA Project Manager.

Electronic copies of Design Reference Documents may be provided to other State Road or NSW Government Authorities by Infrastructure Contracts Branch for use on Government funded projects only

RTA does not permit the possession or use of electronic copies of Design Reference Documents by non-RTA organisations or persons other than as stated above.

Foreword

A consistent and uniform approach to drawing presentation and data transfer is a requirement of the RTA. This has been especially evident since the introduction and ongoing development of Computer Aided Design and Drafting (CADD) technology. Previous limited documentation was distributed, but did not possess the universal acceptance required by this manual. Adherence to this Manual will achieve the required compliance for data transfer and drawing presentation.

This is the third version of this Manual and its release encompasses advances in CADD technology made since the second version of January 2002. This version is more detailed particularly in Section 3, Organisation and Presentation Guidelines. It is intended that this version will be up-dated as required and additional chapters outlining an archive policy and survey guidelines will be added when available.

This Manual is to be referred to in RTA professional services contract briefs. Its use is commended to all who undertake professional services on behalf of the RTA, whether they are internal staff or external providers.
Acknowledgement

The review of this Manual has been undertaken by staff from various elements of the RTA’s Technical Services Branch, Operations Directorate on behalf of Road Network Infrastructure Directorate. This review was completed with valuable and extensive input from a range of areas within Technical Services Branch.

Sincere appreciation is extended for all those who contributed.
