SPRAYED SEALING GUIDE

Roads and Traffic Authority
New South Wales
This Guide was produced as the result of a DELPHI questionnaire which identified and highlighted a need to improve sprayed sealing within the Authority.

The work was divided into four areas and Project Teams were formed as shown below.

This Guide was produced by:

Steering Committee

Mr R Sharpe (Convener)
Mr G Youdale
Mr J Jordan
Mr C Blomfield

Mr J Rebbechi (Vicroads)
Mr P Walter
Mr R Gaughan

Project Teams

(a) Operations
Mr G Youdale (Convener)
Mr P Walter
Mr S Williamson

(b) Administration
Mr C Blomfield (Convener)
Mr P Knee
Mr J Jordan

(c) Seal Design
Mr J Jordan (Convener)
Mr R Gaughan
Mr T Atkins
Mr J Proctor
Mr P Walter
Mr B Bligh
Mr G Hennessy
Mr L Kok

(d) Materials
Mr R Gaughan (Convener)
Mr J Cunningham
Mr M Howard
Mr G Hennessy
Mr I Stewart
Ms M Sutherland
Mr S Williamson
Mr L Kok
Mr P Walter
Mr D Bligh

Others

Mr G Farrugia
Mr G Tooma
Mr H Gopalani
Mr J Leung
Mr J Walker (Consultant)

Mr Y Tharan
Mr B Williams
Mrs M Smith
Mr T Gegg

The results of this work provided the basis for the preparation of this Guide.

Editing of this Guide was carried out by the Asphalt and Sprayed Surfacing Unit, Materials Services Branch.
Acknowledgements

The Authority wishes to thank and acknowledge the following:

- Vicroads for permission to use its Bituminous Surfacing Manual as a source material for this guide.

- AUSTROADS for permission to use its publications as source materials.

- Standards Australia for permission to use diagrams from Australian Standards, as indicated in this document.

- Australian Road Research Board reports and publications as a background source.

- The following publication as a reference source:

Title: Sprayed Sealing Guide

Identification: TP-GDL-001

Issue: Edition 2

Controlled Copy Number: SSG 21130

Date of Issue: February 1997

Directors' Note
This Guide is based on currently available information and reflects current practices for the selection, design, application and maintenance of sprayed seals in NSW. The Guide has been prepared and revised to assist personnel involved in road construction and maintenance. It attempts to set out a sound fundamental approach to good sprayed sealing design and practice.

Registration for Revisions

It is proposed to update this Guide from time to time so that it remains a useful working document.

To ensure that the Guide remains current and does not become outdated, one of the enclosed Registration Amendment postcards should be forwarded in the event of:

- Change of address
- Change of holder

Details of new addresses, or subsequent holders, should be advised to the Manager Bituminous Surfacings immediately the Guide is obtained. Please ensure that all details are supplied. Postcards are supplied on the next sheet for this purpose and should be forwarded to:

RTA Technology
Att: Manager, Bituminous Surfacings
P O Box 331
BEACONSFIELD NSW 2014

Revision details

Failure to forward a registration card or to notify changes of address may result in revisions not being supplied and this Guide will become outdated.

Revisions of the Guide will be on a cost recovery basis, however in designing the layout of the Guide and the timing of subsequent revisions, every effort will be made to ensure that costs are kept to a minimum.

The Edition No. and date shown within the footer/header on each page of the Guide applies to that page only.
