GENERAL NOTES

ROCK FALL FENCE TYPE 5 - SHEET B

1. These fences are intended to give a typical layout of the rockfall containment structures. They shall be reviewed or modified by qualified engineers prior to their use for specific projects.

2. Dimensions shown are for guidance only. These fences are based on particular fence posts. If another post size is adopted, corresponding details shall be revised to suit.

3. Position of the fence and protection for vehicle impact shall be checked with the road safety and traffic management sections of the RTA.

4. All welds must be cold galvanized prior to installation.

5. Welds are to be designed to take 1.3 of the ultimate tensile strength of the connecting cable.

6. The construction of the fence shall be in accordance with RTA QA SPECIFICATION R161 FENCING.

7. The performance of the fence shall be in accordance with RTA PERFORMANCE SPECIFICATION.
