Roads and Maritime Services Standard Bridge Drawings

Abstract

The Roads and Maritime Standard Bridge Drawings have been prepared for the purpose of standardising the presentation of the various types of drawings and details that are used for documenting bridge construction and bridge rehabilitation drawings.

The Roads and Maritime Standard Bridge Drawings have the purpose of maintaining a consistent quality of drafting standard for structural drawings for bridges and related structures prepared by or for the Authority or for bridges and related structures which will become the property of the Authority in the future.

What do they contain?

The Roads and Maritime Standard Bridge Drawings contain necessary information and illustrate the minimum requirements, for the detailing of drawings for bridges and related structures.

Who are they for?

The Roads and Maritime Standard Bridge Drawings are designed for use by all personnel carrying out work for Roads and Maritime funded bridges or bridges that will become the property of the Roads and Maritime in the future, with the aim of ensuring consistency of content and presentation of all drawings for the construction of new bridges or the rehabilitation, maintenance or widening of existing bridges.

Related documents

The Roads and Maritime Standard Bridge Drawings have been prepared in accordance with the requirements of the Roads and Maritime Structural Drafting and Detailing Manual and reflect the relevant policies that are documented in the Bridge Policy Manual.

Amendments to the Drawings

Any necessary amendments to the Roads and Maritime Standard Bridge Drawings, caused by change in policy or process, will be issued as required to maintain currency of the Roads and Maritime Standard Bridge Drawing set.
