The most recent revision to Test method T1015 (other than minor editorial changes) are indicated by a vertical line in the margin as shown here.

Test method T1015

Microbiology of water used in road works (Thermotolerant coliforms)

1. Scope

This test method sets out the procedure to determine the concentration of thermotolerant coliforms in water.

2. General

- (a) This method is applicable to water used in roadworks
- (b) The procedure used depends on the turbidity in the water

3. Apparatus, Preparation, Procedure and Calculations

- (a) For low-turbidity water, carry out testing in accordance with AS 4276.7
- (b) For turbid water, carry out testing in accordance with AS 4276.6

4. Reporting

Include the following data and results in the report:

- (a) The reporting specified in the relevant Australian Standard for thermotolerant coliforms
- (b) Reference to this test method
