The most recent revision to Test method T213 (other than minor editorial changes) are indicated by a vertical line in the margin as shown here.

Test method T213

Particle shape by proportional calliper

1. Scope

This test method sets out the procedure to determine the proportion of flat particles, elongated particles, and flat and elongated particles, contained in those fractions of a coarse aggregate retained on a 9.5 mm sieve.

2. General

This test method is generally applicable for pavement materials, sealing and concrete aggregates.

3. Apparatus, Preparation, Procedure, Calculations and Reporting

This test method is identical to AS 1141.14 except for the following amendment:

- (a) Include reference to T213 in the report.
