		Date on Test Method Revised to Agree with Date on Revision Summary	D.Dash	Feb 2001
Ed 2/ Rev 0	All	Reformatted RMS template	J Friedrich	October 2012

Note that Roads and Maritime Services is hereafter referred to as 'RMS'.

The most recent revision to Test method T301 (other than minor editorial changes) are indicated by a vertical line in the margin as shown here.

# Test method T301

## Consistence of concrete (slump test)

### 1. Scope

This test method sets out the procedure for determining the consistence of concrete, by the slump test when the nominal size of aggregate does not exceed 40 mm. The test may be carried out in the laboratory or in the field and is not intended as a measure of workability.

### 2. Test Requirements, Procedure and Reporting

The method is identical with the procedure described in Section 1 of AS 1012.3 - Methods for the Determination of Properties Related to the Consistence of Concrete.
