# Test method T305

## Inspection and capping of concrete compression test specimens

### 1. Scope

This method sets out the procedure for the inspection and capping of concrete cylinders for use as compression test specimens.

### 2. Test Requirements, Procedure and Reporting

The method is identical with the procedure described in the relevant Clauses of AS 1012.9 - Method for the Determination of the Compressive Strength of Concrete Specimens.

Conditions are set out in Clause 4 of AS 1012.9 under which concrete cylinders may be rejected as unsuitable for compression strength testing.
