The most recent revision to Test method T306 (other than minor editorial changes) are indicated by a vertical line in the margin as shown here.

Test method T306

Compressive strength of concrete specimens

1. Scope

This test method sets out the procedure for determining the compressive strength of concrete test specimens which have been prepared in accordance with the provisions of Test Method T304 and inspected and capped according to Test Method T305.

2. Test Requirements, Procedure and Reporting

The method is identical with the procedure described in the relevant Clauses of AS 1012.9 - Method for the Determination of the Compressive Strength of Concrete Specimens, except that the requirements of Clause 6.1 (b) (i) of AS 1012.9 shall not apply.
