# Test method T314

## Method of mixing concrete in the laboratory

### 1. Scope

This method sets out the procedure for mixing concrete to the slump stage in the laboratory. The method is applicable to the design of concrete mixes, the preparation of trial batches of concrete proposed as job mixes and as preliminary test to ascertain the suitability of available materials.

### 2. Test Requirements, Procedure and Reporting

The method is identical with the procedure described in AS 1012.2 - Method for the Preparation of Concrete Mixes in the Laboratory.
