Test method T315
Indirect tensile strength of concrete cylinders
OCTOBER 2012
Note that Roads and Maritime Services is hereafter referred to as ‘RMS’.

The most recent revision to Test method T315 (other than minor editorial changes) are indicated by a vertical line in the margin as shown here.
Test method T315

Indirect tensile strength of concrete cylinders

1. Scope
This test method sets out the procedure for the determination of the indirect tensile strength of standard concrete cylinders, prepared in accordance with T304.

2. Test Requirements, Procedure and Reporting
The method is identical with the procedure described in AS 1012.10 - Method for the Determination of Indirect Tensile Strength of Concrete Cylinders ('Brazil' or Splitting Test)
