The most recent revision to Test method T327 (other than minor editorial changes) are indicated by a vertical line in the margin as shown here.

Test method T327

Making and curing of concrete flexural test specimens

1. Scope

This test method describes the procedure to be followed in the making and curing of flexure test specimens of concrete samples in the laboratory or in the field.

2. Test Requirements, Procedure and Reporting

The method is identical with the procedure described in Section 2 of AS 1012.8 - *Method for Making and Curing Concrete Compression, Indirect Tensile and Flexure Test Specimens, in the Laboratory or in the Field* except that the dimensions of test specimens shall comply with the size requirements of Clause 2.5.2(b) of AS 1012.8.
