Test method T504

Flash point by Pensky-Marntens open cup tester

1. Scope

This test method sets out the procedure to determine the open flash point of residual bitumen.

2. General

The test is also applicable to petroleum products except fuel oils that have an open cup flash point below 80°C.

3. Apparatus, Preparation, Procedure, Calculations and Reporting

This test method is identical to AS 2341.14 “Methods of testing bitumen and related road making products - Determination of flash point of residual bitumen” with the following amendment:

- (a) Include reference to this test method in the report.
