Test method T602

Compaction of test specimens of asphalt – Marshall procedure

1. Scope

This test method sets out the procedure for preparing test specimens of asphalt by the Marshall procedure. The method conforms with the method of compaction set out in the Australian Standard 2891.5.

2. Safety Notes

Heat resisting gloves or tongs should be used when handling hot bituminous materials. Loosen or puncture lids before heating containers. Solvents such as toluene should be used within a fume cupboard. Safety data sheet should be consulted before handling any materials.
