Traffic Engineering Officer in Training
Technical Services Traineeship Program
Build your future with Transport for NSW

Transport for NSW (TfNSW) is one of Australia's biggest public sector agencies. Right now, we're delivering a $55.6bn program – the largest Australia has ever seen – to keep people and goods moving, connect communities and shape the future of our cities, centres and regions. The unprecedented investment in state wide infrastructure makes it an exciting time to join us.

When you join TfNSW you become part of a forward-thinking organisation, which continually improves the delivery of safe and efficient journeys across NSW. You'll have the chance to work on history making projects and provide a difference to the communities and businesses of NSW.

At Transport, we're also committed to creating a diverse, inclusive and flexible workforce, which reflects the community and the customers we serve.

Technical Services is based in Sydney with offices around NSW regions:
- **Hunter** – Newcastle
- **Northern** – Grafton
- **Western** – Parkes
- **South West** – Wagga Wagga
- **Southern** – Wollongong
- **Sydney** – Parramatta

How to apply
Applicants can apply online via the website www.rms.nsw.gov.au/rdit
Benefits of the Traffic Engineering Trainee Program

- Competitive remuneration package
- University fees refunded in full once program is completed successfully
- Yearly textbook allowance
- Study leave and exam leave
- Flexible working arrangement
- Career development in the form of structured training and on-the-job development
- Diverse opportunities in traffic engineering related discipline
- Access to mentors
- Buddy support and networking opportunities
- Excellent career path opportunities with TFNSW

Traffic Engineering industry

Are you interested in a career on designing and developing solutions for traffic engineering and management? Are you looking for a challenging, on-the-job training experience? Then the Traffic Engineering Officer in Training Program might be for you.

- You’ll receive hands-on training in the development of traffic engineering solutions under the supervision of qualified and experienced traffic engineers.
- You will work on challenging traffic engineering projects across NSW and also have an opportunity to learn from inspiring leaders and experts from other fields such as road design, project delivery, traffic modelling, network safety, network asset intelligence, and urban design.

This program gives you an excellent chance to play a key role in shaping the future of traffic technology and support our communities.

WHAT WE DO

- Help support and manage the content of Transport standards and policy in relation to traffic management, in addition to facilitating innovation through research and trials.
- Provide advice and support in the application of guidance and delineation in the Transport network.
- Build the reputation of Transport for NSW as a technical leader in traffic management solutions during the development and delivery phases of projects to improve safety, consistency and road user experience at Transport road work sites throughout NSW.
Technical Services Trainee Program

OUR VALUES

- Customer at the centre
- People at the heart
- For the greater good

Our Values

Our values define who we are and how we do things. They are the beliefs that guide our actions and behaviour. They influence the way we work with each other, the way we serve our customers and how we engage with stakeholders.

CORE PRINCIPLES:

- Customer at the centre
- People at the heart
- For the greater good

Our values define who we are and how we do things. They are the beliefs that guide our actions and behaviour. They influence the way we work with each other, the way we serve our customers and how we engage with stakeholders.

OUR 5 WAYS OF LEADING:

- Empowering
- Creative
- Courageous
- Caring
- Sustainable

What is involved?

As a Traffic Engineering Officer in Training you’ll be working full time for TfNSW for four years and completing an online Associate Degree in Engineering, offered in partnership with Western Sydney University.

At the end of the four-year program, you might consider continuing your studies towards a Civil Engineering degree at a university of your choice, independently.

All trainees undergo a comprehensive and thorough training program for four years. The traineeship combines both ‘on the job’ (practical) and ‘off the job’ (theory) training.

During your time as a TfNSW trainee, you’ll be working closely with experts in the field and learning from inspiring leaders. You’ll also develop the technical expertise and skills to secure a job in the road or traffic related industry. If you’re interested in designing traffic solutions and studying engineering, this could be the opportunity for you.

What we are looking for

- Motivated individual
- Proficiency in mathematics and physics
- Team player
- Good communication skills
- Potential leaders
- Driven and passionate
- An interest in engineering studies

Eligibility

- Sound HSC-level knowledge of physics and mathematics
- Meet the requirements to enrol for Associate Degree in Engineering (Civil) with Western Sydney University, The College.

Duration of training

Four years - comprises of working a 35 hour week and studying online in your own time.
