NEW BRIDGE OVER NANAMI CREEK

Nationals Member for Dubbo Troy Grant today announced work to replace Douglas Bridge, over Nanami Creek, on the Eugowra to Canowindra Road (Main Road 238) has been completed.

“Bridges provide important links for regional communities and it is critical they provide safe and reliable access and service,” Mr Grant said.

“The replacement of the timber bridge was jointly funded by the NSW Government and Cabonne Council under the Regional Roads Timber Bridge Partnership at a total cost of $440,000.”

“Work involved replacing the existing timber bridge which was six metres long and seven metres wide with a new 10 metre long, eight metre wide, single-span concrete bridge.” Mr Grant said.

The Timber Bridge Partnership Program targets the replacement of council managed timber bridges on regional roads in both Sydney and rural areas.

This project replaces the last timber bridge on Main Road 238 between Canowindra and Eugowra.
