SAFETY WORK TO BE CARRIED OUT ON TIP ROAD DUNMORE

Member for Kiama Gareth Ward today said that safety for motorists crossing the rail line at Tip Road Dunmore is about to be improved with Roads and Maritime Services (RMS) about to start upgrade work.

"The $1.1 million railway crossing upgrade is funded by the NSW Government railway crossing safety improvement program," Mr Ward said.

"Work will include the installation of boom gates and an upgrade to existing flashing lights and bells at the crossing.

"The work will improve road safety at the rail line by preventing vehicles from crossing when a train is approaching," Mr Ward said.

"Additional work to widen the road and improve signs and line marking will also be carried out.

"Work is expected to start early next month and will be completed by the end of June, weather permitting," Mr Ward said.
