WORK TO EASE TRAFFIC CONGESTION IN JINDABYNE COMPLETED

Member for Monaro John Barilaro today announced work to reduce traffic congestion in Jindabyne has been completed.

"Roads and Maritime Services (RMS) has extended the westbound merge lane on Kosciuszko Road by about 200 metres," Mr Barilaro said.

"This is great news heading into winter as it will mean traffic travelling to the snow fields will be able to move more freely through town, without causing the congestion we sometimes see,"

"A new footpath has also been built near the Snowy Mountains Grammar School and repairs made to the kerb and gutter."

“The new pedestrian path is 150 metres long and 2.5 metres wide."

“The new path connects an existing path east of Barry Way to the front of the school, improving access and safety."

“The NSW Liberal and Nationals Government is committed to ensuring that Jindabyne is equipped with the right infrastructure to facilitate its role as both a year round holiday destination and a great home to its permanent residents.”
