WIRE ROPE SAFETY BARRIERS FOR KAMILAROI HIGHWAY

Roads and Maritime Services (RMS) has this week started work to improve safety on the Kamilaroi Highway between Narrabri and Gunnedah.

Member for Tamworth Kevin Anderson said RMS has provided $120,000 to install wire rope safety barriers along 8.8 kilometres of the highway at eight locations where the road narrows.

“The work will improve safety for all road users including heavy vehicles,” Mr Anderson said.

“By making these safety improvements the Kamilaroi Highway between Narrabri and Gunnedah can be opened to road trains.

“The work is part of the NSW Government's commitment to allow road trains on to more regional roads.

“This will improve freight distribution and productivity in the western region,” Mr Anderson concluded.
