Progress Continues On Mona Vale Road Upgrade

Member for Pittwater Rob Stokes today welcomed the release of a report summarising the key issues to be considered as part of planning for the proposed upgrade of Mona Vale Road.

Immediately following last year's State Election, the NSW Government began preliminary investigations for a proposal to upgrade and widen Mona Vale Road to four lanes between Ingleside and Terrey Hills.

Following extensive community consultation at the end of 2011, a Community Consultation Summary Report has now been released by the Roads and Maritime Services to assist the project team during the next stages of planning.

"This is another important step in the progression of this project," Rob Stokes said today.

"Mona Vale Road is now squarely under the spotlight after years of being pushed aside.

"This report summarises the key issues raised during the first phase of community consultation and will assist the project team as they begin developing design options.

"Investigations of this scale have never before been undertaken despite Mona Vale Road's longstanding notoriety.

"Copies of the report are available by visiting the NSW Government's major road project website www.rta.nsw.gov.au/roadprojects/index.html

"Anyone interested in receiving updates on the Mona Vale Road project is encouraged to email the Project Manager at monavaleroad@rms.nsw.gov.au or phone the project's toll-free information line on 1800 633 332.

"More information about the proposed upgrade is expected towards the end of the year and further opportunities will be available for our community to provide comment," Rob Stokes said.
