REPAIR WORK CARRIED OUT AT GALSTON GORGE

Member for Hornsby Matt Kean today alerted residents that slope repair work will be carried out on Galston Road, on the eastern side of the Galston Gorge road crossing at Hornsby Heights.

Downer EDI, on behalf of Roads and Maritime Services (RMS), is planning to carry out the work from Monday 2 July until the end of July, weather permitting.

"The work will repair the slope damaged by heavy rain earlier this year" Mr Kean said today.

"It involves scaling loose rock from the slope, installing rock bolts and strengthening the slope face with a concrete finish"

"Work will be carried out during the day between Monday and Friday from 9am to 4pm"

"The westbound lane which is nearest the work location will be closed during this time to create a safe working area"

"As a result, a section of Galston Road will operate under contra flow traffic control and delays are expected"

The RTA have advised that Motorists should allow extra travel time and follow reduced speed limits.

A temporary work compound will be set up 450m east of the work area occupying three parking spaces at the Berowra Valley Regional Park rest area.

RMS and its contractor Downer EDI apologise for any inconvenience this essential work may cause and appreciate the patience of residents and motorists.

For traffic information contact the Transport Management Centre on 131 700 or visit www.livetraffic.com.
