VEHICLE ACTIVATED SIGNS FOR MOSS VALE ROAD, MACQUARIE PASS AND JAMBEROO MOUNTAIN ROAD

Member for Kiama Gareth Ward today announced that the Roads and Maritime Services (RMS) will start work next week to install vehicle activated signs on Moss Vale Road, Macquarie Pass and Jamberoo Mountain Road.

"The signs aim to improve road safety by advising motorists of speed and wet weather hazards on these three major routes," Mr Ward said.

"A total of nine signs will be installed at locations where excessive speed combined with unanticipated hazards have resulted in crashes.

"This is great news for the community who often feel the effects of crashes on these roads," he said.

"Where there are hazards such as sharp curves on the road, the signs warn motorists who are travelling above the speed limit of the advisory speed when approaching the curve.

"When there is wet weather, the sign detects the rain and lowers the advisory speed limit on display.

"Work to install the signs is expected to take about two weeks to complete, weather permitting," Mr Ward said.
