ROADS AND MARITIME SERVICES TO ATTEND HENTY FIELD DAYS

Roads and Maritime Services (RMS) will take part in the Henty Field Days from 18 to 20 September.

Daryl Maguire said RMS will have a stall at the field days which will feature a Bike Week display with a competition to win two bikes.

"There will also be photographic displays about the Holbrook bypass and Kapooka Bridge project, a vehicle inspection trailer, staff from the motor registry and vehicle regulations to answer any questions and a trailer boat attended by Maritime staff," Mr Maguire said.

"Field day visitors can also stop by the mock driver reviver station for a free tea or coffee and biscuits.

“The customer is at the heart of everything RMS does and the exhibit is a great opportunity for the community to find out about the wide range of services and education RMS provides,” Daryl Maguire said.

Field Day attendees are being urged to visit the RMS exhibit and remember to slow down and drive within the speed limit in their travels to and from the event, to help reduce the road toll in rural NSW.

Daryl Maguire said speeding related crashes continue to be the biggest killer on NSW roads - particularly among young drivers.

"Just a small increase in speed above the posted speed limit amounts to a much higher risk of an injury or a fatality crash for you, your friends and family," Mr Maguire said.
