The Member for Dubbo Troy Grant today announced work to rebuild the road surface of Grenfell Street at Parkes has been completed.

Mr Grant said the $400,000 project was carried out on Grenfell Street between Welcome Street and the Newell Highway (Bogan Street) in Parkes.

“This section of Grenfell Street is a crucial link between the Henry Parkes Way (Main Road 61) and the Newell Highway in Parkes,” Mr Grant said.

“The old road surface was removed and replaced with material designed to better accommodate the mix of traffic which uses this section of road.”

“The work also involved the relocation of a power pole,” Mr Grant said.

Work started in March and was completed on time; line marking is expected to be completed by the end of June.
