Why do we close the road to do maintenance work?

Sections of Moss Vale Road on Barrengarry Mountain and Cambewarra Mountain are narrow and steep with curves in the road. These conditions make it dangerous to have traffic around work sites. By closing the road we create a safer environment for both workers and motorists.

Carrying out work while the road is closed is also more efficient. We can get more work done in a shorter amount of time to minimise disruption to motorists and it ensures a higher standard of maintenance.

Where safe and possible to do so we carry out work at other locations on Moss Vale Road by closing one lane to traffic.

Our maintenance work is not always visible to motorists, but these activities are essential to ensure the long term stability of the road and safety for motorists.

How will the work affect you?

To minimise the impact on the community our work is scheduled to avoid weekends, holiday periods and local events, including the Kangaroo Valley Show, however we may not be aware of all important dates.

Please contact us with the dates of any important community events so we can schedule our work to minimise the impact on the community.

Drop in session

You are invited to drop into an information session to speak to the project team and provide feedback to help plan our work and minimise work impacts.

When: Saturday 14 October 2017 – anytime between 9am and 12pm midday.

Where: The courtyard at 160 Moss Vale Road, Kangaroo Valley.

More information and contact

If you would like to be kept up to date about any work on Moss Vale Road, please provide our project office with your contact details, including your email address.

If you live within a closure area please contact us to receive information about how to access your property during closures.

Information on the maintenance schedule can be found on our new digital mapping tool on our webpage.

Please contact our project office on:
