Corridor Strategies set out the NSW Government’s 20 year plan to manage and guide the development of various road corridors to improve safety, traffic efficiency and sustainability.

Roads and Maritime Services in collaboration with Transport for NSW has prepared a draft Lismore to Bangalow Road Corridor Strategy to address the transport needs of the corridor.

This draft strategy sets out the objectives, current performance and issues in managing the corridor over the long term. It details a series of safety, asset and traffic solutions to address the current and future challenges along the road. The strategy aims to provide transparency and certainty about the direction of future investment.

**Have your say**

Have your say on the draft corridor strategy. Have we captured everything important to you? Do the short medium and long term priorities reflect the issues on the corridor? We want your thoughts on what you think is the most important work. Visit our website at [www.rms.nsw.gov.au](http://www.rms.nsw.gov.au) for more information and to download the strategy and provide feedback.
