Community Advocate
Monthly Report No.4
Gerringong upgrade; Princes Highway

Rowena Lennings
October, 2012

Report outlining activities carried out and issues facilitated by the Community Advocate for the Princes Highway Gerringong upgrade between 1 October and 31 October 2012.
1. Introduction

For the first time Roads and Maritime Services (RMS) has created the position of a Community Advocate on an infrastructure project in Southern Region. This innovative role has been developed and resourced in consultation with interested residents of Gerringong. The role is being piloted on the Gerringong upgrade project, with a view to extending it to additional components of the Princess Highway upgrade.

The Community Advocate was appointed and started work on 14 May 2012. A press release announcing the appointment was issued on 16 May 2012.

This is the fourth regular monthly report from the Community Advocate. This report covers the period between 1 October and 31 October 2012.

2. Scope of role

The Community Advocate is independent of the Gerringong upgrade project team. The main functions of the role are to:

- Support people who are unsure about RMS and project processes by providing advice and an independent view.
- Assist people to raise their issues with the project team and support them in technical discussions.
- Work with the Gerringong community to advise if the project’s community involvement plan is working for them.

3. Objectives

A specific set of objectives have been identified as follows. These objectives are likely to be refined as the project progresses. In this project start-up phase it is particularly important to:

- Achieve visibility and be easily accessible
- Clarify the Advocate’s role with the community and assist in building awareness of contractor’s complaint and enquiry response process.
- Develop an informed understanding of community issues/history.
- Contribute to the resolution of issues.
4. Activities throughout October 2012

The following list identifies the Community Advocate’s activities over the past month.

- Participation in a monthly project team meeting and site visit to become aware of the nature and impact of current construction.
- Briefed Councillors of Kiama Municipal Council.
- Attended a property adjustment meeting on site.
- Responded to telephone inquiries and redirected callers who were seeking information about day to day construction related activities to Fulton Hogan’s (the contractor) Community Liaison Manager.
- Reviewed contacts in the project database (Consultation Manager) to maintain awareness of Fulton Hogan’s management of complaints and inquiries.

5. Outcomes

During this reporting period no issues were raised or referred to the Community Advocate.

Consultation with stakeholders, community representatives, the broader project team and the office of the elected representative support the view that Fulton Hogan’s current community engagement process is progressing effectively.

A small number of complaints have been received to date. Complaints that have been closed out by Fulton Hogan were to the satisfaction of the complainants.

Two issues previously raised with the Community Advocate are pending and outcomes will be reported once they have progressed.

6. Next report

The Community Advocate will now be producing a quarterly report. The next report will cover activities and outcomes from November 2012 to January 2013 and is expected to be available on the RMS project website in mid to late February 2013.
