

Birchgrove Wharf upgrade

THE UPGRADED WHARF

October 2017

The upgraded wharf is designed to provide customers with an improved public transport experience.

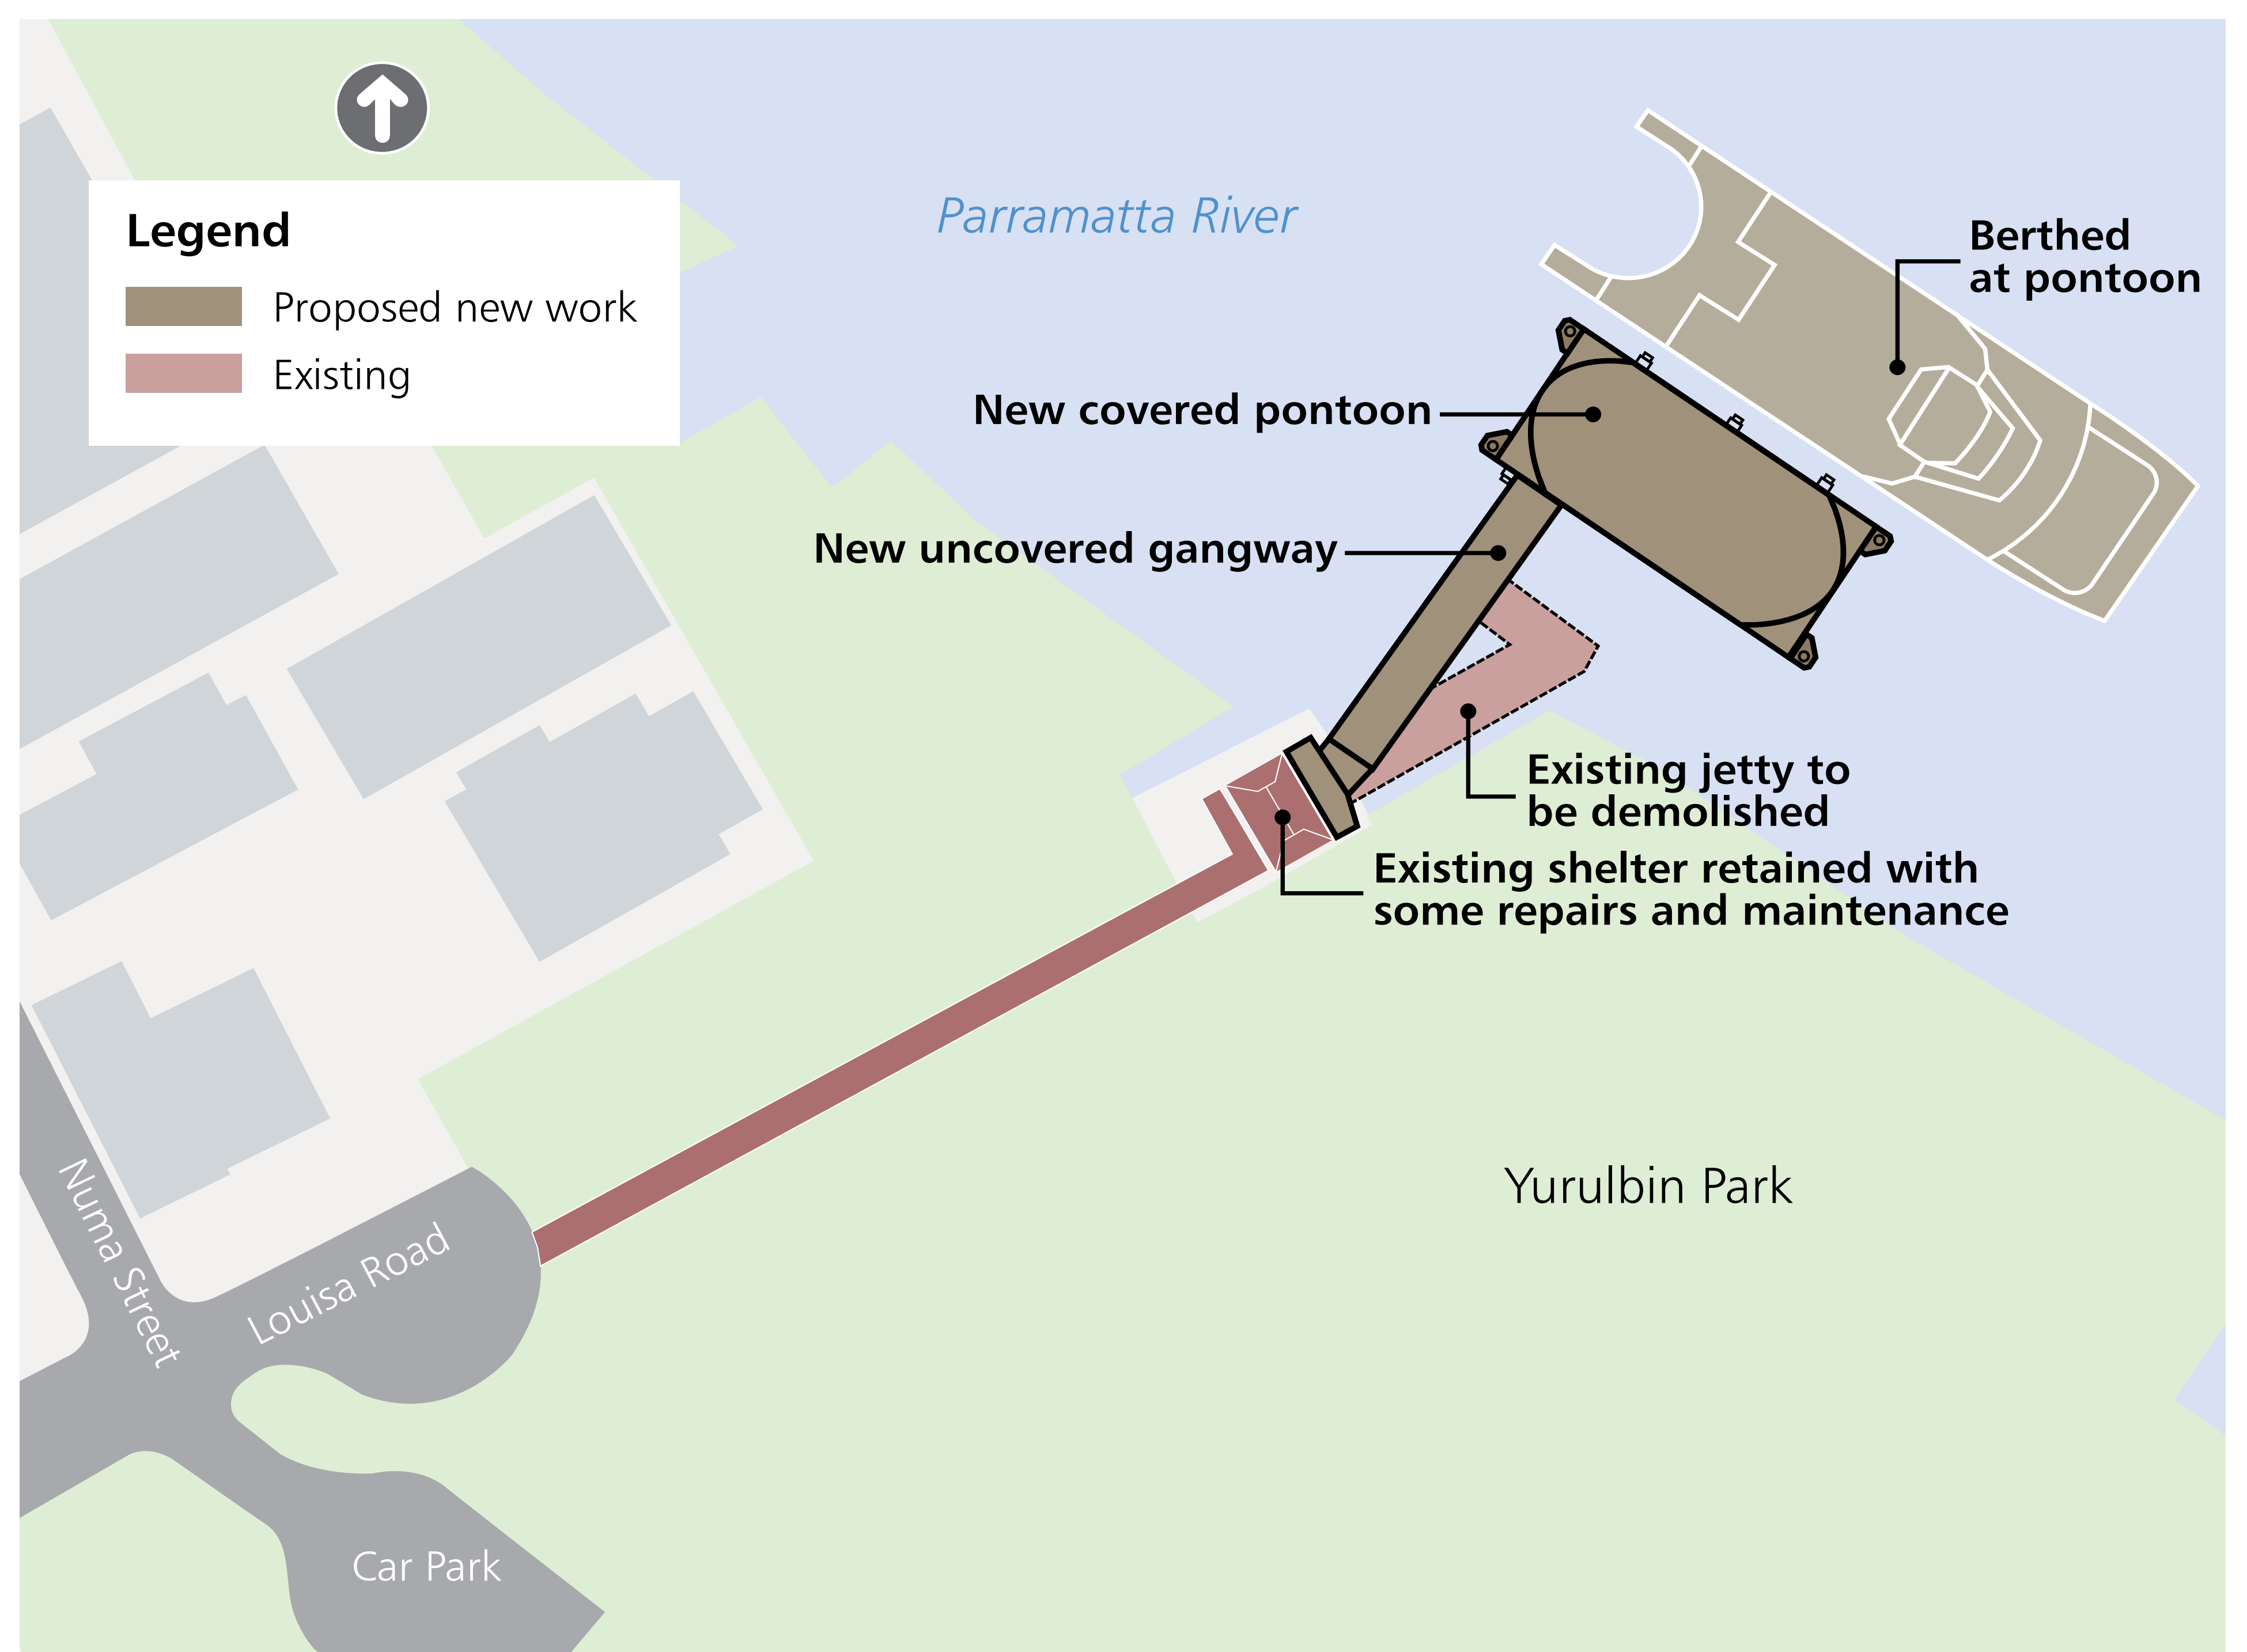

Artist's impression of the proposed new Birchgrove Wharf viewed from the river

The upgraded wharf will incorporate a floating pontoon, gangway and concrete bridge connecting to the existing timber waiting shelter.

The pontoon will have a curved roof which will shelter customers from the weather. Glass weather protection panels and new seating will provide improved comfort. The gangway will be uncovered. The existing timber waiting shelter will be retained with some repairs and maintenance carried out.

The new wharf will look similar to wharves at Drummoyne and Meadowbank which have also been upgraded as part of the NSW Government's Transport Access Program.
