

Rozelle Rail Yards Site Management Work

Night work – Wednesday 21 February and Thursday 22 February, 2018

Rescheduled utility work - Victoria Road, Rozelle

As advised in our notification in December last year, Ausgrid is required to undertake work to disconnect a power cable from a building within the Rozelle Rail Yards site, near the Victoria Road overhead footbridge. This work was originally scheduled to take place in mid-December 2017, however this work was rescheduled. The work will take two nights to complete and will now take place on **Wednesday 21 and Thursday 22 February 2018**, between **11pm and 5am**, weather permitting. Dates are dependent on the availability of the contractor.

This power cable runs beneath the Victoria Road footpath. To safely disconnect the power, Ausgrid require a temporary single lane road closure and pedestrian and cycle path restrictions on the eastern side of Victoria Road. A utility cabinet will be removed and the footpath will be reinstated. **This work will be completed over these two nights.** Electricity supply to neighbouring properties will not be impacted by this work, unless notified directly by Ausgrid.

Hoarding and parapet installation

Hoarding will be installed around a section of the site on the city bound side of Victoria Road, near the pedestrian overpass. The hoarding is being installed in preparation for further infrastructure removal on site. Existing gates at this location will be removed and replaced with a steel gate.

During installation we may need to occupy a section of the pedestrian and cycle path on the eastern side of Victoria Road. To minimise pedestrian and cyclist impacts, this work will take place in conjunction with the above footpath reinstatement work on **Thursday 22 February 2018**.

Traffic, cycling and pedestrian changes

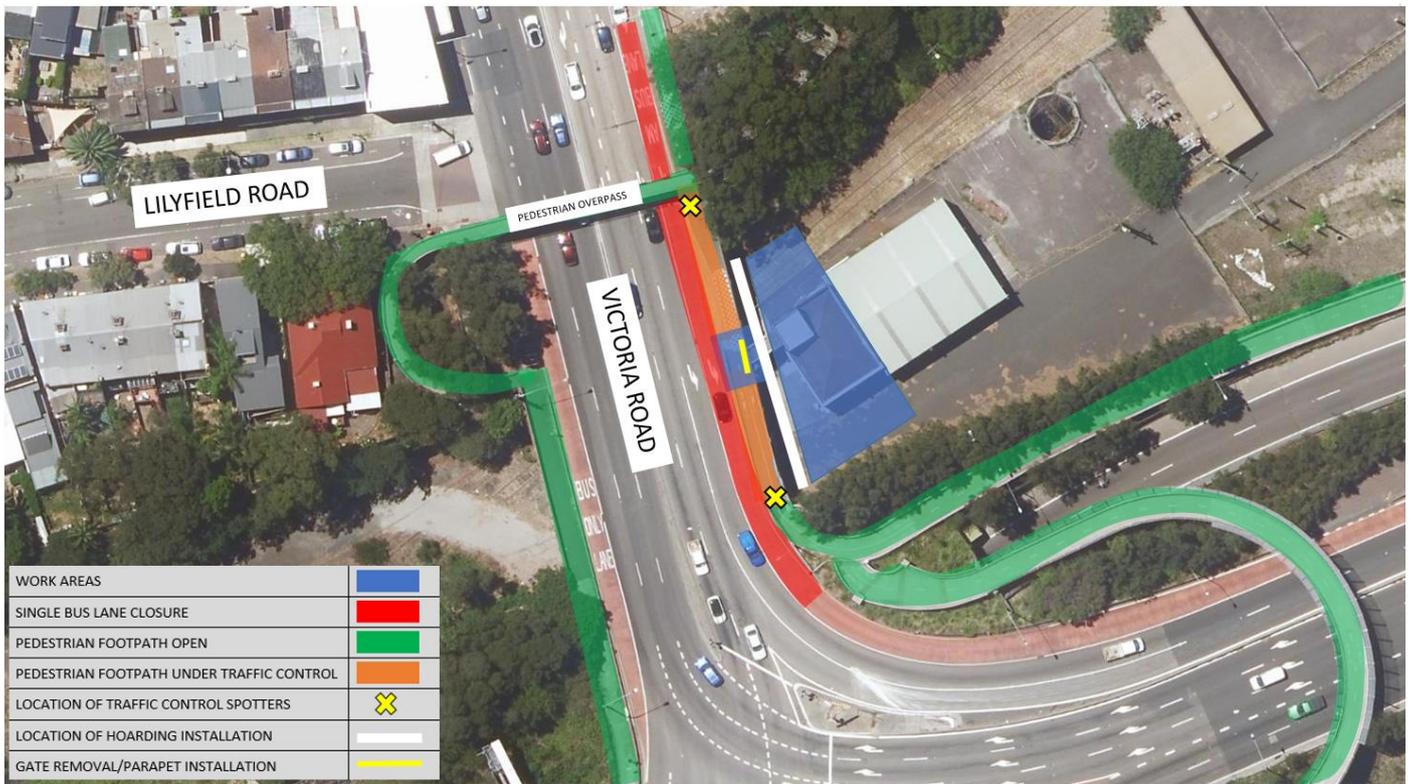

Pedestrian and cyclist access will be maintained at all times by traffic controllers, however users may experience short delays. Access to the pedestrian and cyclist overpass will not be impacted. The Victoria Road eastbound bus lane will be closed from Lilyfield Road to the Anzac Bridge turn off. No impact to bus timetables or travel times is expected. Please see the map overleaf for the location of work.

How will the work affect you?

Noise may be experienced from excavation work, which will involve hand tools, an elevated work platform, compaction equipment and power tools. Lighting will be directed away from residential properties. For your safety, please follow all directional signage and the instructions of traffic control staff. We are committed to minimising the impact of construction on the community and will continue to keep you informed as work progresses.
