

Rozelle Rail Yards, Site Management Works

Drone Photography

As previously notified Roads and Maritime has appointed Fulton Hogan Construction Pty Ltd to carry out clean-up work of the former Rozelle Rail Yards site. As part of the Project, Fulton Hogan will be using a drone to capture time lapse photography of the site.

Photography will occur on a regular basis for the duration of the one year project and take approximately one hour for each shoot. The photography will be undertaken by a trained operator with a Civil Aviation Safety Authority license.

How will the work affect you?

The drone will not fly over occupied areas or residential properties. The privacy of residents will be respected at all times. The drone will remain within the Project alignment, however it may be visible from residential properties along the alignment.

For privacy any images captured will be cropped or pixelated to remove details such as faces or vehicle registration licence plates. No sound recordings will be made as part of the image capture process.

The first shoot is scheduled to commence on **Wednesday 20 September 2017**, weather permitting. The drone photography will always be conducted during the approved working hours of **Monday to Friday** between **7am and 6pm**, and **Saturday** between **8am and 1pm**. No photography will be done on Sundays or public holidays.

Dates will vary month to month due to weather conditions and availability of the drone. If you would like to register to receive a SMS notification prior to each shoot please contact the Project Information Line on 1800 870 248 or email rozellerailyards@fultonhogan.com.au

We are committed to minimising the impact of construction on the community and will continue to keep you informed as the Project progresses.
