

Rozelle Rail Yards Site Management Work

Utility Work – Friday 10 November 2017

As part of the work associated with the Rozelle Rail Yards Site Management Work Project, Fulton Hogan Constructions will be using a section of Lilyfield Road to carry out site utility work. Please see the map overleaf outlining the area in which this work will take place.

This work is required to connect the site compound buildings to the main electricity supply. Electricity supply to neighbouring private properties will not be impacted by this work. A new power pole will be installed with the aid of small trucks and light vehicles. This work is not expected to generate significant additional noise in the area.

Traffic changes

From **7am to 6pm on Friday 10 November 2017**, weather permitting, the southern shoulder of Lilyfield Road will be closed between Grove Street and Cecily Street. Traffic will be maintained in both directions at all times under contra flow. The speed limit will be reduced to 40km p/h and traffic control and signage will be in place to safely direct pedestrians and motorists around this work.

Access to parking on the southern shoulder of Lilyfield Road between Grove Street and Cecily Street will not be available during this work. If the work has started and your car needs to be moved, traffic controllers will assist you with moving your vehicle. The work will take approximately five hours to complete.

We are committed to minimising the impact of construction on the community and will continue to keep you informed as the Project progresses.

If you have any questions or concerns about this work, please contact the Project Information Line on 1800 870 248 or email rozellerailyards@fultonhogan.com.au

If you need help understanding this information, please contact the Translating and Interpreting Service on 131 450 and ask them to call us on 1800 870 248.
