Project update
Sydney Harbour Bridge southern toll plaza precinct upgrade

March 2017

The NSW Government is funding an upgrade to the Sydney Harbour Bridge southern toll plaza precinct to improve safety, simplify traffic movements and improve bus connections to the city.

To minimise impact on traffic and residents, the work is being completed in stages and is expected to be completed by early 2018.

Work carried out so far includes:
- removing the northbound toll booths
- installing new moveable medians
- upgrading drainage
- relocating utilities.

York and Grosvenor Streets intersection
The York and Grosvenor Streets intersection (see map on page two) needs to be upgraded as a result of changes to the way traffic will enter the city from the Sydney Harbour Bridge.

Work at this intersection will be planned in stages to minimise impact on traffic and residents, and will continue throughout the project. As our work schedule will vary, to assist the community we provide a weekly work schedule on the project website.

We will start work in this area from Friday 10 March. Due to the traffic volumes, most of the work will be at night, between 8pm and 5am. We will complete noisier activities by midnight.

Day work will be carried out between 7am and 6pm from Monday to Friday. We may also need to carry out some day work on Saturdays and Sundays.

Work to upgrade the intersection includes:
- upgrading traffic lights and signal posts
- building new road pavement

Project benefits
- Simpler traffic movements on southern approaches to the Sydney Harbour Bridge
- Improved bus connections
- Improved operational flexibility for lane management on Sydney Harbour Bridge
- Fewer road safety hazards

Weekly work schedules
Weekly updates of work are available on the project website. If you would like receive the weekly schedule, please contact the project team on 1800 581 595 or sydneyharbourbridgeprojects@rms.nsw.gov.au.
• removing and replacing kerbs, gutters and pedestrian footpaths
• removing trees
• upgrading an existing moveable median
• installing new traffic islands, medians and crash barriers.

Temporary traffic changes
During times we are working in the area, there may be delays due to changed traffic conditions, including detours for both pedestrians and motorists. We work closely with the Transport Management Centre to minimise traffic impacts. Please follow the direction of traffic controllers, traffic signs and keep to reduced speed limits. Traffic control will be in place and speed limits will be 50 kilometres per hour along the work area.

We will display up-to-date information, including any date changes and detours on electronic message signs leading up to the intersection.

Noise
There may be some noise associated with this work. We will make every effort to minimise its impact by using less noisy work methods and completing noisier work before midnight, where possible.

Location of work

What happens next?
We will continue to keep the community informed during the project, including further specific information on the remaining stages of the upgrade.

Go online
The Sydney Harbour Bridge webpage provides valuable information including animations to help drivers enter and exit the bridge during the work, staging maps and project updates. You can also see timelapse footage of the toll booth removal so far.
