Have your say –
Sydney Harbour Bridge Tolling Systems Upgrade

The NSW Government is planning to upgrade the tolling infrastructure for the Sydney Harbour Bridge and Sydney Harbour Tunnel to ensure the ongoing reliability and future capacity of the tolling system. Roads and Maritime is seeking community feedback on the proposed concept design until Friday 19 December 2014.

Benefits of the project

The Sydney Harbour Bridge Tolling Systems Upgrade Project is an important part of modernising the Sydney Harbour Bridge Precinct and maintaining the performance of our tolling system.

The proposed work includes the construction of four tolling points, comprising two new tolling gantries at each location, and the removal of existing tolling gantries and equipment at the Sydney Harbour Tunnel and a signage gantry on the Warringah Freeway opposite Lavender Street.

The project aims to bring the Sydney Harbour Bridge and Sydney Harbour Tunnel tolling infrastructure in line with other tolling systems in the Sydney region. Once installed, the old tolling booths at the southern end of the bridge can be removed and traffic lanes realigned to further maintain efficiency and improve the appearance of the precinct.

Concept design – Have your say

The community is invited to provide feedback on the concept design for the new tolling infrastructure until Friday 19 December 2014.

The concept design can be viewed at www.rms.nsw.gov.au/shb. Written comments are invited until Friday 19 December 2014 and should be sent to:

What happens next?

All comments received will be considered in finalising the Review of Environmental Factors (REF) for the project. An REF describes the project and explains its likely impacts on a range of factors including traffic, landscape character and heritage values.

The REF will consider issues raised during this consultation and responses to each issue will be included in the REF. If there are further changes to the proposal, the community will be informed.

Roads and Maritime will continue to liaise with the community throughout the project.
