The NSW Government is upgrading Mona Vale Road from two to four lanes between Terrey Hills and Mona Vale. The upgrade is being carried out in two stages to provide customers with a better travelling experience and to improve safety and traffic flow.

Work on the 3.2 kilometre upgrade between Manor Road, Ingleside and Foley Street, Mona Vale will start in early 2019 with completion in 2022, weather permitting.

What’s happening now?

Roads and Maritime Services has awarded the contract for construction to Georgiou Group Pty Ltd.

The project team is working hard to prepare the construction management plans and the program for construction.

The project will:
- upgrade the essential link between Sydney’s northern beaches and the north shore
- improve safety with additional lanes, widened shoulders, a separated median and a heavy vehicle arrester bed
- provide better access for Ingleside and Elanora Heights residents
- enable fauna to cross Mona Vale Road safely by constructing several fauna crossings.
What happens next?
The first activities on site will include:
• removing trees, shrubs and other vegetation on both sides of Mona Vale Road between Daydream Street, Mona Vale, and Lane Cove Road, Ingleside
• installing traffic controls, such as barriers, signs, linemarking
• setting up the site compound for the project team
• delivering materials and equipment to site.

What can you expect during construction?
During construction, Roads and Maritime will aim to minimise the impact on businesses, residents and the community. However, this is a significant project and there will be disruptions including:
• noise and dust from rock cuttings
• traffic changes such as contra-flows and detours
• traffic delays, including additional heavy vehicles on the roads
• night work
• driveway realignment for several residents on Mona Vale Road
• major utility relocations in and around Ponderosa Parade, Samuel Street and Foley Street.

Our working hours
Standard working hours on the project will be between 7am and 6pm from Monday to Friday and 8am to 1pm on Saturdays.

Roads and Maritime is committed to working with the community and will try to minimise the impact to nearby properties and traffic while work is carried out. Given the challenging terrain, and limited space in some sections, it will be necessary to carry out night work to ensure the safety of motorists and workers and minimise the impact on the road network. Residents and businesses will be informed before any night work starts. Access to properties will be maintained during construction.

Mona Vale Road and Ponderosa Parade intersection
As part of the upgrade, the intersection of Mona Vale Road and Ponderosa Parade will be changed to a traffic light intersection.

Features of the new intersection include:
• replacing the existing roundabout with new traffic lights and pedestrian signal crossings in all directions
• new bus priority lanes on Mona Vale Road on the approaches to and departures from the intersection
• relocating the eastbound bus stop on Mona Vale Road further east to the departure side of the intersection
• dedicated right-hand turn lanes on all approaches to the intersection
• left-hand slip lanes on all approaches to the intersection.

The upgraded intersection will significantly improve safety at this location, and improve traffic flow entering and exiting the commercial area.
1 – Heavy vehicle arrester bed

2 – Ponderosa Parade and Samuel Street intersection

3 – Emma Street Intersection

4 – Mona Vale Road and Foley Street intersection

- Heavy vehicle arrester bed
- Widening of existing rock cutting
- Improved drainage
- Fauna underpass crossing
- Fauna crossing
- Widening of existing rock cutting
- Fauna overpass connection to link Katandra Bushland Sanctuary to Ingleside Chase

KEY
- Final design
- Retaining wall
- Shared path
- Detention basin
- Site compound
- Bus priority
- Noise wall
- Widening of existing rock cutting

Roads and Maritime Services

Mona Vale Road East upgrade
Vegetation removal

Roads and Maritime will remove trees, shrubs and other vegetation from both sides of Mona Vale Road, to prepare for the construction work.

This work will take place initially between Daydream Street, Mona Vale, and Lane Cove Road, Ingleside, and between Wirreanda Road and Mona Vale Road, Ingleside (see map below).

The work is expected to take up to 16 weeks to complete, with some work carried out at night for the safety of workers and motorists. Affected residents will be notified in advance of all work, and notifications are available on our website and via email distribution.

During clearing, an independent ecologist is on site to ensure no animals are harmed and any found are relocated to a safe habitat.

The project’s Construction Flora and Fauna Management Plan will be in place to ensure appropriate measures are in place to protect the environment during construction, including establishing exclusion zones and regular monitoring.

Reducing our carbon footprint

To build the Mona Vale Road East upgrade, we need to excavate large volumes of soil and rock. We have planned a way to reuse some of this excess material to prepare for the Mona Vale Road West upgrade.

We will take some excess material to the Mona Vale Road West section where it will be used to build an embankment in readiness for the future widening work on the West project. Work will include relocating power poles, drainage and removing vegetation.

The two projects have been designed to ensure a minimum amount of material is removed from the projects combined. This will reduce the number of truck movements along the corridor, overall cost for both projects, and reduce our carbon footprint.

The work to build this embankment will form part of the early work for the Mona Vale Road West upgrade, and will start from the first quarter 2019. The work will cover around 850 square metres on the northern side of Mona Vale Road, between Kimbriki Road and Tumburra Street, Ingleside.

Early work between Kimbriki Road and Tumburra Street, Ingleside
