Proposed intersection improvements at the Princes Highway, Rocky Point Road and Gray Street, Kogarah

Community Consultation Report

September 2017
Executive summary

This report provides a summary of Roads and Maritime Services' consultation with the community and key stakeholders on proposed intersection improvements at the Princes Highway, Rocky Point Road and Gray Street, Kogarah.

The NSW Government is funding this proposal as part of its $300 million Gateway to the South Pinch Points Program which will improve traffic flow on Sydney's key southern road corridors by upgrading major intersections.

The proposal included:

- removing northbound and southbound right turn access from the Princes Highway into Gray Street
- adjusting the existing median on the Princes Highway to accommodate three southbound through lanes on the Princes Highway between Rocky Point Road and Ocean Street
- improving safety at the intersection of Rocky Point Road and Gray Street by adjusting the traffic signals and removing about two car spaces on Gray Street to allow safer turn movements
- modifying access to Scott Street by extending the current AM peak no right turn to no right turn in or out of Scott Street at all times
- upgrading traffic signals and phasing
- new signage to advise of alternate routes
- installing new kerbs, pram ramps and signage
- asphalting and line marking
- utility relocation.

Roads and Maritime invited feedback on the proposal in May and June. We received feedback from 45 people, with seven people supporting the proposal, four people supporting the proposal with conditions, eight people not stating a preference and 26 people who opposed the proposal.

The people who opposed the proposal raised concerns involving:

- clarification on proposal benefits
- increased congestion in the area
- alternative routes
- access to local roads
- pedestrian safety
- hospital and ambulance access.

We thank everyone for considering the proposal and for their feedback.

The decision

After considering all responses, along with the proposal’s aims and design requirements, we have decided to proceed with the proposal, considering changes as a result of community feedback.

The right turn restrictions at Scott Street will not be implemented at this time. Existing AM peak restrictions will remain in place. Roads and Maritime will continue to monitor the intersection.
performance and safety of Rocky Point Road and Gray Avenue, and will determine if a green right turn arrow and the associated right turn bans at Scott Street are required in the future.

The following changes have also been considered as part of the final design:

- exemption signage on right turn restrictions for emergency services
- investigation into providing additional line marking along Gray Street between Rocky Point Road and the Princes Highway to improve safety and capacity of the road
- investigation into parking removal on Gray Avenue near Rocky Point Road to improve congestion.

We will continue to keep the community and stakeholders informed as the project progresses, including inviting feedback on a night work schedule.

Construction is expected to start in early 2018.

1. Introduction

1.1. Background

The intersections of the Princes Highway, Rocky Point Road and Gray Street have been identified as part of the NSW Government’s $300 million Gateway to the South Pinch Point Program.

This program aims to address critical pinch points along the A1, A3 and A6 routes south of the M5 Motorway, including the Princes Highway. It focuses on short to medium term solutions to improve travel time and reliability for all road traffic including buses and freight.

The Princes Highway is the main route that links the southern coastal towns of NSW with Sydney. Regionally, the Princes Highway is one of three routes that cross the Georges River to link Sutherland Shire (population 226,220) with the Sydney CBD and the inner southern and inner western suburbs of Sydney.

The intersections of the Princes Highway, Rocky Point Road and Gray Street currently cater to around 10,300 and 11,000 vehicles during the AM and PM peak periods. Vehicles travelling north and south on the Princes Highway and Rocky Point Road contribute to high volumes of traffic at all three intersections. Motorists are currently experiencing delays when travelling southbound on the Princes Highway between Rocky Point Road and Ocean Street due to three lanes reducing to two; this is caused due to vehicles queuing in the right turn bays for Gray Street.

The intersection improvements aim to improve the efficiency of the intersections and reduce traffic delays, providing reliable journey times for motorists. These improvements will also aim to reduce the number of rear-end crashes and crashes occurring when motorists change lanes, improving the overall safety of the intersections. In addition these improvements aim to improve the flow of traffic for high volumes of motorists travelling southbound on the Princes Highway between Rocky Point Road and Ocean Street.

1.2. The proposal

Roads and Maritime proposed to remove right turn access from the Princes Highway into Gray Street, in order to maintain three southbound lanes on the Princes Highway between Rocky Point Road and Ocean Street. The proposal also included traffic signal upgrades at the intersection of Rocky Point Road and Gray Avenue and prohibiting the right turn in and out of the adjacent intersection of Scott Street and Rocky Point Road.

The proposal included:

- removing northbound and southbound right turn access from the Princes Highway into Gray Street
- adjusting the existing median on the Princes Highway to accommodate three southbound through lanes of traffic on the Princes Highway between Rocky Point Road and Ocean Street
- improving safety at the intersection of Rocky Point Road and Gray Street by adjusting the traffic signals and removing about two car spaces on Gray Street to allow safer turn movements
- modifying access to Scott Street by extending the current AM peak no right turn to no right turn in or out of Scott Street at all times
- upgrading traffic signals and phasing
- new signage to advise of alternate routes
- installing new kerbs, pram ramps and signage
- road surfacing and line marking
- utility relocation.

We have included a map to explain the proposal.
Figure 1- Proposed intersection improvements at the Princes Highway, Rocky Point Road and Gray Street, Kogarah.

Figure 2- Updated intersection improvements at the Princes Highway, Rocky Point Road and Gray Street, Kogarah.
2. Consultation approach

2.1. Consultation objectives

We consulted with the community and key stakeholders on the proposal to:

- Seek comment, feedback, ideas, and suggestions for us to consider when making a decision
- Build a database of interested and concerned community members with whom we can continue to engage during the proposal’s development and delivery.

2.2. How consultation was done

Community members and stakeholders were encouraged to provide their feedback and make comments via email, mail or phone contact with the project team.

We distributed 2500 letters (appendix A) to local residents, businesses (Appendix B) inviting feedback on the proposal. Copies were also provided to key stakeholders.

3. Consultation summary

3.1. Overview

Roads and Maritime invited feedback on the proposal in May and June. We received feedback from 45 people, with seven people supporting the proposal, four people supporting the proposal with conditions, eight people not stating a preference and 26 people who opposed the proposal.

The people who opposed the proposal raised concerns involving:

- clarification on proposal benefits
- increased congestion in the area
- alternative routes
- access to local roads
- pedestrian safety
- hospital and ambulance access.

After considering all responses, along with the proposal’s aims and design requirements, we have decided to proceed with the proposal, considering changes as a result of community feedback.

The right turn restrictions at Scott Street will not be implemented at this time. Existing AM peak restrictions will remain in place. Roads and Maritime will continue to monitor the intersection performance and safety of Rocky Point Road and Gray Avenue, and will determine if a green right turn arrow and the associated right turn bans at Scott Street are required in the future.

The following changes have also been considered as part of the final design:

- exemption signage on right turn restrictions for emergency services
- investigation into providing additional line marking along Gray Street between Rocky Point Road and the Prince’s Highway to improve safety and capacity of the road
- investigation into parking removal on Gray Avenue near Rocky Point Road to improve congestion.
3.2. Feedback and Roads and Maritime’s responses

Roads and Maritime has provided responses to all feedback received on this proposal. The responses are provided directly to the person who commented, as well as in this report, which will be made available to the public.

All comments have been considered to help Roads and Maritime make decisions on this proposal. Matters raised during consultation that are not within Roads and Maritime’s areas of responsibility have been forwarded to the relevant departments.
<table>
<thead>
<tr>
<th>Category</th>
<th>Key matters raised</th>
<th>Response</th>
</tr>
</thead>
<tbody>
<tr>
<td><strong>Access for emergency services</strong></td>
<td>Request for ‘Ambulance Vehicles Excepted’ signage for right turn restrictions so emergency vehicle access to Gray Street is not impacted.</td>
<td>Roads and Maritime will provide an ‘Ambulance Vehicles Excepted’ in addition to the proposed ‘No Right Turn’ signage from the northbound lanes of the Princes Highway into Gray Street towards Rocky Point Road.</td>
</tr>
<tr>
<td><strong>Alternate routes</strong></td>
<td>Has an alternative route study been done as part of this proposal?</td>
<td>An alternative route study has been carried out as part of this proposal. The assessment considers existing restrictions in the study area, including heavy vehicle restrictions on Jubilee Avenue and Bowns Road.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>The Princes Highway currently services around 2500 northbound vehicles and 2200 southbound vehicles during peak periods. The right turn restrictions at the intersection of the Princes Highway and Gray Street will improve the efficiency of the intersection and increase the capacity of the road to three lanes. Potential impacts to motorists as a result of this restriction have been considered, including the assessment of low vehicle volumes currently using the right turn lane travelling southbound on the Princes Highway into Gray Street.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>The alternate routes via Jubilee Avenue and Bowns Road and Queens Avenue have been identified as part of the alternative route study that was conducted for this proposal. The suggested alternative route to Gray Street via Jubilee Avenue is estimated to add about two minutes to a motorist’s journey.</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Roads and Maritime have identified two of many possible alternate routes that vehicles travelling northbound from the Princes Highway into Gray Street could use. Alternate routes depend on the origin and destination of the motorist.</td>
</tr>
<tr>
<td></td>
<td>The turning bay for motorists travelling northbound on the Princes Highway into Jubilee Avenue needs to be extended.</td>
<td>Roads and Maritime has identified two of many possible alternate routes that vehicles travelling northbound from the Princes Highway into Gray Street could use. Alternate routes depend on the origin and destination of the motorist.</td>
</tr>
<tr>

<td>Key matters raised</td>
<td>Response</td>
</tr>
<tr>
<td>----------</td>
<td>----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
<td>----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------</td>
</tr>
<tr>
<td></td>
<td>A right turn arrow is needed for vehicles turning right from Jubilee Avenue onto the Princes Highway northbound.</td>
<td>Low volumes of vehicles currently use the right turn movements at the intersection of the Princes Highway and Gray Street. Redirecting these vehicles via alternative routes is not expected to impact other intersections in the study area, including the intersection of the Princes Highway and Jubilee Avenue.</td>
</tr>
<tr>
<td></td>
<td>The intersection of Jubilee Avenue and the Princes Highway will be unable to cope with increased vehicle volumes as a result of the alternative routes.</td>
<td>Roads and Maritime have identified two of many possible alternate routes that vehicles travelling northbound from the Princes Highway into Gray Street could use. Alternate routes depend on the origin and destination of the motorist.</td>
</tr>
<tr>
<td></td>
<td>The alternate routes will cause increased delays for parents dropping and picking up children at schools in the surrounding area.</td>
<td>The alternate route for motorists travelling north and southbound via alternative routes to Gray Street will result in an additional two to three minutes travel time.</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
</tr>
<tr>
<td>Buses</td>
<td>Right turn restrictions will impact the current bus routes that operate in this proposal area travelling southbound from the Princes Highway into Gray Street.</td>
<td>During the development of this proposal we identified that the bus operator in the area will be affected by the removal of the southbound right turn bay at the intersection of the Princes Highway and Gray Street. Roads and Maritime has been in consultation with the bus operator in the area prior to the wider community consultation to develop an agreed alternative route.</td>
</tr>
<tr>
<td>Clarification of proposal benefits</td>
<td>What are the benefits of this proposal for southbound traffic?</td>
<td>The intersections of the Princes Highway, Rocky Point Road and Gray Street service over 10,300 and 11,000 vehicles travelling through southern Sydney during peak periods.</td>
</tr>
<tr>
<td></td>
<td>The removal of two car spaces on Gray Avenue is unlikely to improve safety or traffic flow.</td>
<td>Localised congestion at these intersections is predominately caused by:</td>

</tbody>
</table>
|                               | How will the right turn bans improve traffic flow?                                  | • minor right turn movements from the Princes Highway into Gray Street, in both directions, taking away green time from other movements  
• high volumes of vehicles travelling southbound on the Princes Highway being reduced to two lanes between Rocky Point Road and Ocean Street.  

Restricting the right turns from Princes Highway into Gray Street in both directions will improve the overall flow of traffic along the road network, including the following benefits:  
• the existing right turn bay can be utilised to create an additional southbound through lane on the Princes Highway which will reduce overall intersection delays and increase capacity of the road network  
• the increased capacity at the intersection will allow more green time for both Gray Street and the Princes Highway  
• increased capacity for high volumes of vehicles travelling southbound on the Princes Highway will result in a flow on reduction in delays for surrounding roads, including the intersection of the Princes Highway and Rocky Point Road, and Rocky Point Road and Gray Street.  

Pedestrian access and safety will also be improved as part of the proposal at the intersection of the Princes Highway and Gray Street. Currently there are only four pedestrian/pram ramps at the intersection. As part of the proposal pedestrian/pram ramps will be installed on all four corners of the intersection to provide a safe crossing. |

<td></td>
<td>Restaurant and business customers are double-parking near double unbroken lines and in no stopping areas near Shaw Street, Kogarah.</td>
<td>The purpose of this consultation was to seek feedback on intersection improvements at the Princes Highway, Rocky Point Road and Gray Street, Kogarah. It is illegal to stop a vehicle (that is, bring it to a stop and either stay with the vehicle or leave it parked), double parked on the road alongside a car that is parked. This includes stopping for more than two minutes in a ‘No Parking’ sign posted area. You must remain in or within three metres of the vehicle. Hours of operation may apply to some signs. This means restrictions apply for those times only. Mobility Parking Permit holders are allowed to park for up to five minutes. The enforcement of traffic laws remains a primary responsibility of the NSW Police Force. This includes motorists disobeying road rules. Roads and Maritime encourages you to contact St George Local Area Command on (02) 8566 7499, who will determine whether targeted enforcement activities may be appropriate.</td>

4. **Decision**

We thank everyone who provided comments and the community and stakeholders for considering the proposal.

After considering all responses, along with the proposal’s aims and design requirements, we have decided to proceed with the proposal. As a result of community feedback the right turn bans at Scott Street will not be implemented at this time. Roads and Maritime will continue to monitor the intersection performance and safety of Rocky Point Road and Gray Avenue, and will determine if a green right turn arrow and the associated right turn bans at Scott Street are required in the future. The following changes have also been considered as part of the final design:

- exemption signage on right turn restrictions for emergency services
- investigation into providing additional line marking along Gray Street between Rocky Point Road and the Princes Highway to improve safety and capacity of the road
- investigation into parking removal on Gray Avenue near Rocky Point Road to improve congestion.

5. **Next steps**

We will continue to keep the community and stakeholders informed as the project progresses, including inviting feedback on a night work schedule.

Construction is expected to start in early 2018.
6. Appendices

6.1. Appendix A – ‘Have your say’ letter May 2017

Have your say: Proposed intersection improvements at the Princes Highway, Rocky Point Road and Gray Street, Kogarah

May 2017

The NSW Government is funding this proposal as part of its $300 million Gateway to the South Pinch Points Program which will improve traffic flow on Sydney’s key southern road corridors by upgrading major intersections.

Benefits of the proposal would include:
- improved safety at the intersection, with an expected reduction in the number of rear-end crashes and crashes involving motorists changing lanes
- reduced traffic delays due to a better flow of traffic for motorists headed southbound on the Princes Highway.
Background
In February 2015, the NSW Government committed $300 million to address critical pinch points along the A1, A3 and A6 routes south of the M5 Motorway which includes:

- The Princes Highway
- King Georges Road
- Heathcote Road
- The Grand Parade
- Stacey Street
- New Illawarra Road and
- Alford’s Point Road.

The Gateway to the South Pinch Points program focuses on short to medium term solutions to improve travel time and reliability for all road traffic including buses and freight.

Currently, motorists experience delays when travelling southbound on the Princes Highway between Rocky Point Road and Ocean Street, as the road is restricted to two lanes as a result of the right turn bays into Gray Street.

Proposal
The proposal includes:

- removing northbound and southbound right turn access from the Princes Highway into Gray Street
- adjusting the existing median on the Princes Highway to accommodate three southbound through lanes of traffic on the Princes Highway between Rocky Point Road and Ocean Street
- improving safety at the intersection of Rocky Point Road and Gray Street by removing about two car spaces on Gray Street to allow safer turn movements
- modifying access to Scott Street by extending the current AM peak no right turn to no right turn in or out of Scott Street at all times
- upgrading traffic signals and phasing
- new signage on Rocky Point Road into Gray Street to advise of alternate routes
- installing new kerbs, pram ramps and signage
- asphalt and line marking
- utility relocation.

We have included a map to help explain the proposal.
Alternative routes to access Gray Street

As part of this proposal, Roads and Maritime have undertaken an alternative route study, which determined that 0.77km is the maximum additional distance motorists would travel as a result of the removal of right turn access into Gray Street.

Alternative routes to access Gray Street are:

- Jubilee Avenue (northbound)
- Bowns Road (northbound)
- Rocky Point Road (southbound)

St George Hospital can be accessed via Gray Street and Rocky Point Road (southbound).

We have included a map to help explain the alternative routes.
Alternative routes to access Scott Street

Currently, vehicles cannot turn left from Rocky Point Road into Scott Street during AM peak hours. Roads and Maritime are proposing to ban the left turn in and out of Scott Street at all times to help support traffic flow at this intersection.

The alternative routes to access Scott Street are:
- Rocky Point Road, Shaw Street and Gray Street (northbound)
- Rocky Point Road, Prince Highway and Gray Street (northbound)

The alternative route to exit Scott Street is:
- Scott Street, Scott Lane and Toomevara Street (northbound)

We have included a map to help explain the alternative routes.

Next steps

We will carefully consider all feedback before deciding to proceed with the proposal. A community consultation report will be prepared, summarising the matters raised and our responses. This will be made available on our website. We will keep you updated as the proposal progresses.
