Rose Bay Seaplane Facility upgrade

Stage two construction to start
Tuesday 1 March 2016

The Rose Bay Seaplane Facility at Lyne Park is being upgraded. On-site work to upgrade the facility will start on Tuesday 1 March and is expected to be completed by August 2016, weather permitting. Seaplane operations will continue and the foreshore, nearby businesses and Lyne Park will be accessible during construction.

On site work to upgrade the wharf was scheduled in two stages to minimise potential impacts during the summer peak when there is more activity in and around the bay. Stage one work to install some piles was carried out in November 2015. Stage two on site work will commence on Tuesday 1 March 2016 and is expected to be completed by August 2016. Seaplane operations will continue and the foreshore, nearby businesses and Lyne Park will be accessible during construction.

A construction management plan will be in place during construction. The project team will work directly with stakeholders to minimise potential impacts and keep the local community updated.

We thank you for your patience during this work and apologise for any inconvenience.
