

# Intersection improvements on Stacey Street and Fairford Road, Bankstown

Roads and Maritime Services | February 2018

The NSW Government is funding these improvements as part of its \$300 million Gateway to the South Pinch Point Program.

Stacey Street, Bankstown

## Improving your journey

Roads and Maritime is carrying out improvements along Stacey Street and Fairford Road to get you to the important things quicker, providing a safer more reliable journey.

We are widening Stacey Street between Macauley Avenue and Stanley Street. We are also improving the capacity and flow of the intersections at Stacey Street, Fairford Road and Macauley Avenue and Stacey Street and Stanley Street.

Construction is expected to start mid-2018, keep up to date via our project page [rms.nsw.gov.au/sfb](http://rms.nsw.gov.au/sfb).

道路和海事服务局将对斯泰西街 (Stacey Street) 和费尔福德路 (Fairford Road) 进行升级改良。如需更多信息，请转到本手册的后面。

## Stage one: Stacey Street widening (southbound)

We are widening the southbound lanes of Stacey Street between Macauley Avenue and Stanley Street to provide three lanes in the southbound direction for road users. We are also extending the existing dual right turn bay on Stacey Street for road users travelling right into Macauley Avenue.

This work will allow for existing and future road users to move quicker through the road corridor, connecting you to southern Sydney, Sydney CBD and Sydney's west.

## Stage two: Stacey Street widening (northbound) and intersection improvements at Stacey Street, Fairford Road and Macauley Avenue

We are widening the northbound lanes of Stacey Street between Macauley Avenue and Stanley Street to provide three lanes in the northbound direction for road users. We are also improving the Stacey Street and Macauley Avenue intersection to provide a quicker journey for a large number of road users turning right from Macauley Avenue onto Fairford Road.

Work includes:

- changing one of the left turn lanes into a right turn lane on Macauley Avenue for road users travelling southbound onto Fairford Road
- widening Fairford Road to provide three northbound lanes and a left turn lane at the intersection of Macauley Avenue.

## Stage three: Intersection improvements at Stacey Street, Stanley Street and Salvia Avenue

We are improving this intersection to provide a more reliable and safe journey for road users turning out of Stanley Street onto Stacey Street. We are continuing to work with Council to develop the final design for this stage.

Proposed work includes:

- widening Stanley Street to create a more direct route to Salvia Street

- adding dual right turn lanes out of Stanley Street
- extending the right turn bay into Stanley Street, from Stacey Street
- installing a signalised pedestrian crossing across Salvia Avenue.

## Construction staging and traffic impacts

These improvements will be constructed in stages to minimise impact to local residents and the road network.

## Speak to the project team

We will be in your local area during February to talk about the upcoming improvements to Stacey Street and Fairford Road. Our interactive map and members from the project team will be available to answer your questions at:

Bankstown Central Shopping Centre  
Stacey Street & North Terrace, Bankstown  
(near the food court)

### Thursday 22 February

4pm – 6pm

### Saturday 24 February

10am – 1pm

## Check out our interactive portal

For more information on the project take a look at our interactive portal and online map. Zoom in for the details, find FAQ's on the project area and view the location of the work. Check it out at [rms.nsw.gov.au/sfb](https://rms.nsw.gov.au/sfb)

## Gateway to the South Program

In February 2015, the NSW Government committed \$300 million to address critical pinch points along the A1, A3 and A6 routes south of the M5 Motorway. The program focuses on short to medium term solutions to improve travel time and reliability for all road users. To find out more about the Gateway to the South Pinch Point Program please visit [rms.nsw.gov.au/g2s](http://rms.nsw.gov.au/g2s)

### What is a pinch point?

Pinch points are intersections or short lengths of road at which a bottleneck exists. These bottlenecks can occur from increased vehicle volumes on the network and growth in the area. Bottlenecks cause a build-up of vehicles and can result in travel delays for motorists travelling along the road network.
