Road work at the intersection of O’Riordan Street, Sir Reginald Ansett Drive and Joyce Drive.

The Australian and NSW Governments are upgrading roads east of Sydney Airport to improve traffic flow and access to the airport and Port Botany.

As part of the Airport East project, we need to rebuild the intersection at O’Riordan Street, Sir Reginald Ansett Drive and Joyce Drive to work in with the surrounding road upgrades and widening of Joyce Drive.

We are carefully planning this work in stages to minimise disruption in the area. We have planned three full weekend shifts between 9 February 2018 and 26 March 2018 to complete the work.

The first weekend of work is scheduled for 9pm Friday 9 February to 5am Monday 12 February 2018, weather and construction conditions permitting.

You will be notified of further work in a separate notification.

There will be temporary traffic changes in place which will affect travel times. Motorists are advised to expect delays, allow extra travel time and avoid non-essential travel in the area.

There will be extensive signage, traffic controllers and NSW Police in place to help direct traffic in and around the work area. Follow the direction of traffic controllers and signs at all times and keep to the speed limit.

Work Schedule

In order to reduce the impact of the work, it will be split into stages over three weekends.

Weekend One

We will be carrying out work at the intersection of O’Riordan Street, Sir Reginald Ansett Drive and Joyce Drive;

- access to the Domestic Airport will be via Ross Smith Avenue, Sir Reginald Ansett Drive, Ninth Street or Seventh Street.
- motorists heading eastbound on Qantas Drive should turn right into Seventh Street to access the Domestic Airport, where a contraflow arrangement will be in operation.
- motorists heading southbound on O’Riordan Street will be directed to Ninth Street to access the Domestic Airport.
- one lane in each direction will remain open on Joyce Drive.
How will the work affect you?

Work during the weekends will include:

- removing and excavating the existing road
- laying and rolling new asphalt
- line marking and installing signage.

There will be some noise, dust, vibration and disruption associated with this work. Machinery and equipment used will include trucks, excavators, lighting towers, road saws, paving machines, rollers, vacuum trucks, grinders, light vehicles and hand tools.

Lighting towers will be directed away from properties at night, where possible. Pedestrian access will be maintained at all times, although minor temporary detours will be in place during the work.

Roadwork speed limits are enforceable, please follow the direction of traffic controllers and signs.

For the latest traffic updates, you can call 132 701, visit livetraffic.com or download the Live Traffic NSW App.

Contact

If you have any questions or need additional information, please contact our delivery partner John Holland Group on 1300 862 844 or comms.airporteast@jhg.com.au. For more information on this project, visit www.rms.nsw.gov.au/sydneyairport.

Thank you for your patience during this important work.
