

Camp Street Bridge replacement

Display of Environmental Factors

Visualisation of the new bridge

Roads and Maritime Services is planning to replace the Camp Street Bridge over Lake Forbes to improve safety for road users and help reduce future maintenance costs.

The existing bridge is narrow, in poor condition and nearing the end of its life. The new bridge will meet current design standards while complementing the surrounding environment and the town's heritage aesthetics.

An animated visualisation of the new bridge and surrounds can be viewed on the project webpage.

Roads and Maritime invites you to provide feedback on the Review of Environmental Factors (REF) by **Friday 27 July 2018**.

New pathways
for active transport

Working with local communities

Improving safety

New bridge

Drop in sessions

Come by anytime to view the REF and speak with the project team at any of the following locations:

Lachlan Street Forbes
(outside Bernardi's Supermarket)
Saturday 30 June, 9am - 12pm

Rankin Street Forbes
(next to Target)
Friday 6 July, 10am - 2pm

Have your say

Please provide feedback on the REF by **Friday 27 July 2018**, by sending your written comments to:
