

July 2017

Survey and investigation work for the proposed Appin Road upgrade, Gilead from Tuesday 1 August 2017

On behalf of the NSW Government, Lendlease is investigating the proposed upgrade of a three kilometre section of Appin Road from two lanes to four lanes between Mt Gilead and Ambarvale. This proposal will unlock new housing and reduce travel times as part of the NSW Government's plans for the Greater Macarthur Priority Growth area.

The proposal for the widening of Appin Road includes the improvement of three intersections at Copperfield Drive and Kellerman Drive, Fitzgibbon Lane and Kellerman Drive and St Johns Road to reduce congestion and improve safety.

Survey, geotechnical and pavement investigation work will take place between **Tuesday 1 August 2017** and **Friday 20 October 2017**, weather permitting, to inform the concept and detailed design process of the proposed upgrade. This work may include setting up survey equipment, taking photographs, executing boreholes and test pits, and putting localised traffic diversions in place.

We may require access to some private properties in order to carry out this work. If we need to access your property we will contact you in advance to discuss access requirements.

How will this work affect you?

The investigation work will be carried out on the road reserve or on private property along the proposed corridor with minimal impact on the community. Access to properties and businesses will be maintained at all times.

We have included a map to show you where we will be working.

Contact

If you have any questions, please contact the project team on **1800 810 680** or appinroadupgrade@ghd.com. For more information on the Appin Road Upgrade project, visit <http://www.rms.nsw.gov.au/projects/illawarra/appin-road>

Thank you for your patience during this work.
