

Batemans Bay Bridge replacement

Community update – Submissions report

May 2018

Artist's impression of the concept design for the Batemans Bay Bridge replacement

In November 2017, Roads and Maritime Services asked for feedback on the environmental assessment and concept design for the Batemans Bay Bridge replacement. This feedback is being used to help develop the detailed design, which will be on display later this year.

Submissions report is released

The Submissions report addresses and responds to all feedback received during the environmental assessment and concept design displayed in November 2017. The report is available at rms.nsw.gov.au/batemansbaybridge.

What you told us and key design changes

On the map, we have addressed some of the key issues raised by the community during the concept design that was displayed last year.

All issues raised by the community, key stakeholders, government agencies and council are detailed in the Submissions report.

Please view or download the Submissions report at www.rms.nsw.gov.au/batemansbaybridge.

Next steps

A detailed design of the new bridge will be available to the community later this year, following the announcement of the design and construct contractor. Construction of the new bridge is expected to start in early 2019.
