Changes to Wharf Road and Old Punt Road access for motorists and pedestrians

Work is progressing well on the Batemans Bay Bridge replacement project with earthworks progressing at the northern end of the project area.

What are we doing?

As part of the design for the new Batemans Bay Bridge, access changes for Wharf Road will be implemented from **Monday 27 April 2020** until **mid 2021**, weather permitting. These changes include:

- the permanent closure of southbound access to the Princes Highway from Wharf Road, and
- the temporary closure of southbound access to Wharf Road via the Princes Highway

Old Punt Road pedestrian footpath will also be re-opened for the **Easter long weekend** from **9 to 13 April 2020** and will then temporarily close until **later this year**, weather permitting.

These access changes are required for the safety of motorists, pedestrians, cyclists and workers as Wharf Road realignment earthworks, construction of a new roundabout, and the reconstruction of Korners Park as part of the northern foreshore upgrade get underway.

From the Princes Highway, motorists will be able to access Wharf Road via Peninsula Drive. Pedestrian, beach and private property access will be maintained at all times and a temporary bus turnaround area will be established near Korners Park. In the event of an emergency and area evacuation Peninsula Drive or Berrima Parade should be used as alternative routes and we are working with Police to investigate additional options.

Signs will also provide pedestrian detour information and directions to an alternative disabled toilet facility near the bus stop on Clyde Street when the Korners Park toilet facility is closed.

For pedestrians travelling from Wray Street to Korners Park or the town centre, the existing Old Punt Road pedestrian detour route will remain in place except during the **Easter long weekend** between **9 and 13 April 2020**. Old Punt Road pedestrian access will resume in **late 2020**, weather permitting.
What you need to know

Construction of the new Wharf Road and Princes Highway intersection and related activities on the northern foreshore will include earthworks, drainage installation, construction of a new shared pedestrian and cyclist path, and installation of a permanent water quality basin.

The new Wharf Road roundabout will be completed in two stages to ensure private property access, pedestrian and beach access, and a safe turnaround area for buses.

The upgrade of the northern foreshore will include extensive earthworks, drainage installation, construction of a new disabled toilet facility, and pavement. Equipment will include small and large excavators, concrete trucks, various other truck types, and cranes.

Wharf Road changed vehicle access

Maintaining pedestrian access throughout the project area

Pedestrian access close to construction work will be maintained where possible. Your safety is important to us so at times there may be some restrictions or detours. For your safety, please follow all signs and remain on the paths. The community will be notified of any access changes and alternative routes. Please contact the project team for any questions or concerns about your access.

If you need help understanding this information, please contact the Translating and Interpreting Service on 131 450 and ask them to call us on 1800 870 119.
