

February 2018

Dear resident,

A temporary protected right turning lane is planned to be built at the Croziers Road and Princes Highway intersection to improve road safety and accessibility for motorists before major construction of the Berry to Bomaderry Princes Highway upgrade starts.

The work will include building a temporary **right turning lane** for safer access of motorists into Croziers Road from the Princes Highway heading south. This work is planned to start on **Wednesday 21 March 2018**. We will also relocate the existing bus stop to the Croziers Road u-turn bay and install additional safety barriers on the highway as part of this work.

View the enclosed diagram for recently completed and upcoming road safety work including:

- the trimming of trees and shrubs to improve motorist's sight distance in each direction, relocation and/or removal of existing signage to improve visibility, increased NSW Police patrols, installation of larger 80km/h speed zone signs, extension of the 80km/h zone approaching the intersection from the north, installation of 80km/h speed limit ahead warning signs and a speed radar-activated electronic messaging sign. **This work was completed in February 2018.**
- the design for a temporary right turning lane into Croziers Road, improving road safety and accessibility. **This work will start in March 2018.**
- future changes to your journey to allow for safe access for motorists turning into Croziers Road during construction. **This work will begin following the start of major construction.**
- the final intersection layout.

Relocating the bus stop

The relocation of the bus stop will allow for the widening work to occur for the right turn lane and also improve bus stop user safety by relocating the facility from the highway.

We are in ongoing contact with transport operators and informing bus stop users about the relocation of the facility to the Croziers Road u-turn bay. Croziers Road u-turn bay will be the final location of the bus stop once the highway upgrade project is complete. Contact your transport provider for more information and to understand how the relocation of the bus stop may change your journey.

Night work is planned to complete this work

To minimise traffic disruptions during peak travel periods, we are required to carry out work at night between **6pm to 4.30am from Wednesday 21 March to Thursday 29 March**, weather permitting. This work will include relocation of the existing bus stop, installation of additional safety barrier, and line marking of the highway near the Croziers Road intersection.

Every effort to minimise disruption will be undertaken while work is being carried out. These measures include completing the noisiest work early in the shift, using low impact machinery where possible and turning off machinery when not in use. Access to properties and Croziers Road will be maintained while work is being carried out.

Motorists are advised to please follow the direction of traffic controllers and signs. For the latest traffic updates, you can call 132 701, visit or download the Live Traffic NSW App.

Thank you for your patience during this important work.

Any questions?

If you have any questions please call the project team team on 1800 506 976 (option 3) or BerrytoBomaderryUpgrade@rms.nsw.gov.au

Yours sincerely,

Jason Lloyd
