

Installation of new clearways on the Centennial Avenue and Burns Bay Road corridor between Lane Cove and Huntleys Point

Roads and Maritime Services | February 2018

The NSW Government is funding this project as part of its \$121 million Clearways Program, which aims to reduce congestion and delays on Sydney's roads.

Roads and Maritime Services is installing new weekday and weekend clearways on the Centennial Avenue and Burns Bay Road corridor between Epping Road, Lane Cove and Victoria Road, Huntleys Point. We have included a map to show the location of the new clearways.

The new clearways will be operational from **Monday 19 March 2018**.

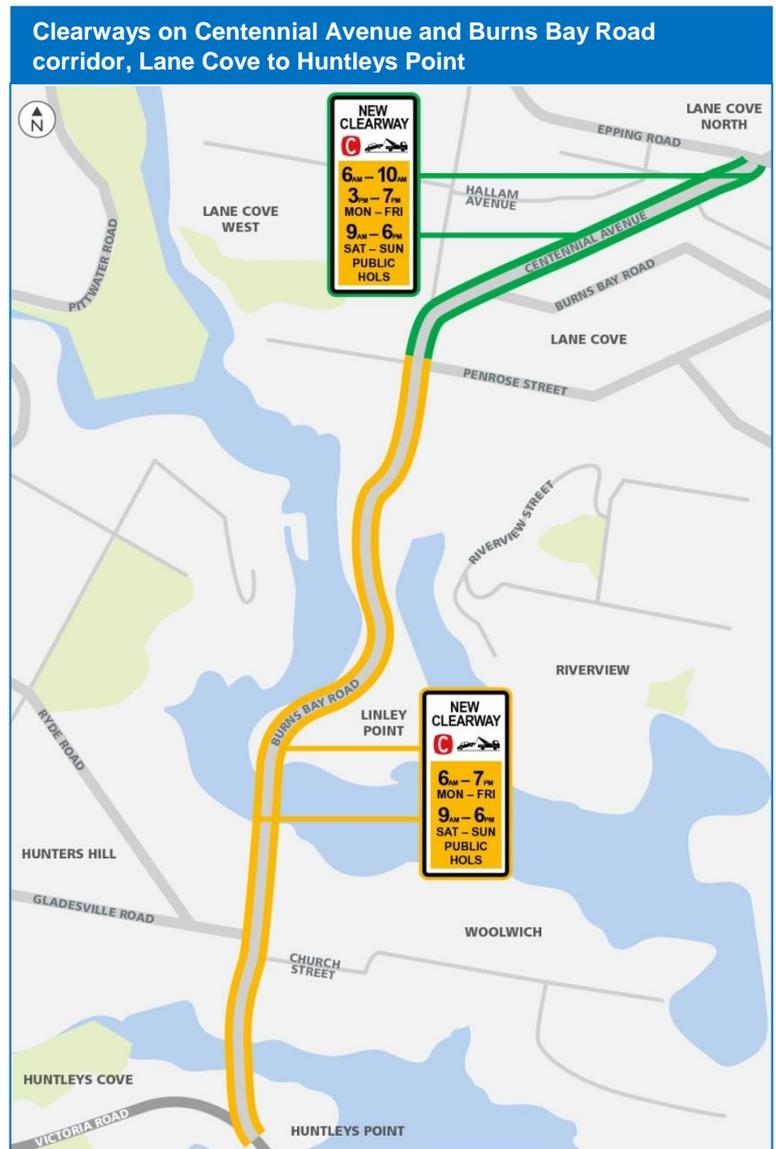

Any vehicles parked in the clearways on or after this date would risk being fined and towed.

There are no changes to existing parking restrictions outside the new clearway hours on the Centennial Avenue and Burns Bay Road corridor.

Frequently asked questions

Following the announcement of the clearways on Centennial Avenue and Burns Bay Road corridor in December 2017, the community raised a number of questions about the clearways.

Roads and Maritime have addressed the most frequently asked questions and the data used for determining the clearways hours in a document that is available on the project page, which can be found on rms.nsw.gov.au/clearways.

What happens next?

The new clearways signs and posts will be installed between **Wednesday 7 March 2018** and **Sunday 18 March 2018**, weather permitting. Our working hours will be between **8pm** and **5am** from **Monday** to **Sunday**.

During the installation work, there will be some temporary traffic changes to ensure the work zone is safe. Lane closures will be in place and may affect travel times. Please keep to speed limits and follow signs and traffic controllers' directions. For the latest traffic updates, you can call 132 701, visit livetraffic.com or download the Live Traffic NSW App.

How will the work affect you?

There will be some noise associated with this work but we will do everything we can to minimise its impact, including completing the noisier tasks by **11pm**.

What is a clearway?

A clearway is a section of road where stopping and parking is not allowed during the times shown on the clearway sign. Clearways are put on key arterial roads where traffic is often heavy and congested. They help keep vehicles moving by making all lanes available to motorists.

Buses and taxis, as well as emergency vehicles, are allowed to stop on a clearway to drop off or pick up passengers.

If you park in a clearway during the clearway hours, you risk being fined and your vehicle can be towed.

As a resident or visitor, what does this mean for me?

We understand that the new clearway hours will change parking conditions in front of residential properties, which will cause some inconvenience for residents and visitors.

Following the installation of the new clearways, residents, tradespeople, delivery trucks and visitors are encouraged to park within residential properties during clearway hours, wherever possible.

If parking is not available on your property, parking will need to happen in a local side street. This is similar to all other state roads where clearways and 'No Stopping' restrictions are in place.

The Centennial Avenue and Burns Bay Road corridor

The Centennial Avenue and Burns Bay Road corridor is a key state road (number 166) connecting the two state roads of Epping Road and Victoria Road, which was gazetted in 1976. This arterial road is managed and maintained by Roads and Maritime Services.

Centennial Avenue and Burns Bay Road were identified in the clearways strategy for weekday peak clearways and weekend clearways in both directions.

The corridor is a four lane road. The investigations of 2017 traffic signal data found that during the weekday, around 46,000 vehicles travel on Burns Bay Road and around 25,000 vehicles travel on Centennial Avenue. On weekends around 39,000 vehicles travel on Burns Bay Road and 23,000 vehicles travel on Centennial Avenue.
